By following a distinctive approach in explaining algebra College Algebra helps alleviate the readers anxiety toward math. New sections on modeling have been added at the end of each chapter. Sections have been included on Limits and Early Functions. There are also numerous examples integrated throughout the pages to assure that all problem types are represented. These examples contain more detailed annotations using everyday language. This approach encourages readers to develop sound study and problem solving skills.

Instructor's Edition Raymond Barnett, 2010-01-01 The Barnett Ziegler Byleen Sobecki College Algebra series is designed to give students a solid grounding in pre calculus topics in a user friendly manner. The series emphasizes computational skills ideas and problem solving rather than theory. Explore Discuss boxes integrated throughout each text encourage students to think critically about mathematical concepts. All worked examples are followed by Matched Problems that reinforce the concepts being taught. New to these editions Technology Connections illustrate how concepts that were previously explained in an algebraic context may also be solved using a graphing calculator. Students are always shown the underlying algebraic methods first so that they do not become calculator dependent. In addition each text in the series contains an abundance of exercises including numerous calculator based and reasoning and writing exercises and a wide variety of real world applications illustrating how math is useful.
