Diversity in African languages Doris L. Payne, Sara Pacchiarotti, Mokaya Bosire, 2016-12-31

Diversity in African Languages contains a selection of revised papers from the 46th Annual Conference on African Linguistics held at the University of Oregon. Most chapters focus on single languages addressing diverse aspects of their phonology, morphology, semantics, syntax, information structure, or historical development. These chapters represent nine different genera: Mande, Gur, Kwa, Edoid, Bantu, Nilotic, Gumuzic, Cushitic, and Omotic. Other chapters investigate a mix of languages and families, moving from typological issues to sociolinguistic and inter-ethnic factors that affect language and accent switching. Some chapters are primarily descriptive, while others push forward the theoretical understanding of tone, semantic problems, discourse-related structures, and other linguistic systems. The papers on Bantu languages reflect something of the internal richness and continued fascination of the family for linguists, as well as maturation of research on the family. The distribution of other papers highlights the need for intensified research into all the language families of Africa, including basic documentation in order to comprehend linguistic diversities and convergences across the continent. In this regard, the chapter on Daatsi in Gumuzic stands out as the first ever published article on this hitherto unknown and endangered language found in the Ethiopian-Sudanese border lands. Somaliland Philip Briggs, 2012. Little known to the outside world, Somaliland has much to offer the truly intrepid traveller. This pioneering guidebook introduces one of the world's least chartered travel destinations. Author Philip Briggs covers everything from the low-key capital Hargeisa and mediaeval port of Berbera to peerless rock art sites such as Las Geel and the scenery and wildlife of the Daallo Escarpment, towering 2,000m high above the pristine reefs of the Gulf of Aden. Somaliland's ruined cities and historical ports date back 5,000 years and have links with ancient Egypt and Axum in northern Ethiopia, as well as the Ottoman and British Empires. This guide offers background and practical information to every accessible corner of the country, with the only real maps in existence of its capital and other large towns, and a section on wildlife. *The Form of Structure, the Structure of Form* Sabrina Bendjaballah, Noam Faust, Mohamed Lahrouchi, Nicola Lampitelli, 2014-12-15. This volume brings together articles by some major figures in various linguistics domains: phonology, morphology, and syntax, aiming at explaining the form of linguistic items by exploring the structures that underlie them. The book is divided into 5 parts: vowels, syllables, templates, syntax, morphology, interface, and Afro-Asiatic languages. Specific topics are the internal structure of vowels and its relation to harmony, the logic of recurrent vocalic patterns, syllabic prominence, the interaction of syllabic and templatic structure, and segmental realization, the innateness of templates and paradigms, the limits of phonology, and various morpho-syntactic implications on phonological form. The volume renders homage to Jean Lowenstamm's work by underlining the importance of seeking structural and intermodular insight in the study of linguistic form. **How Somali Muslims Become Christians in Europe** Mátyás Bódi, 2026-02-27. Somali Christians constitute one of the world's most persecuted religious minorities, yet their experiences have received remarkably little scholarly attention. This book offers the first in-depth examination of conversion from Islam to Christianity among Somalis and presents the first empirically grounded theory explaining how

individuals in the Global North navigate this transition and eventually disclose their new faith to Muslim relatives and communities Focusing on Somali converts living in the United Kingdom and Sweden the two European countries with the largest Somali immigrant populations the study sheds light on the complex and often precarious process by which individuals move from initial doubts to open commitment It not only traces the stages of this journey but also highlights the moral dilemmas intellectual challenges social dynamics and practical decisions that shape a convert s path By exploring both internal struggles and external pressures this book provides a rare and nuanced account of what it means to leave Islam for Christianity This volume will be of interest to scholars of religion and migration leaders in Muslim communities Christian workers ministering among Somali and other Muslim background populations as well as policymakers and human rights professionals

How Somali Muslims Become Christians in Europe invites deeper reflection on the lived experience of religious freedom in contemporary societies
