The Archetypal Plant Angela Lord, 2015-10-26 Rudolf Steiner painted his Archetypal Plant watercolour in 1924 at a time when contemporary scientific methodologies were emerging and nature was being examined under the microscope In contrast to the dissecting tendencies of natural science however Steiner's painting depicts the living dynamic potential which

stands behind the plant lifting us out of the specific genus and providing an image of the growing and formative forces inherent within each individual plant Researching Rudolf Steiner's painting of the Archetypal Plant can help reconnect our outer sense perceptions with the inner realm of imaginative cognition releasing us from the spell of matter To support and enliven such research work and processes Angela Lord surveys her subject matter from various aspects including the historical evolutionary relationships we share with plants the representation of plants in art and architecture plant myths and legends poetry inspired by flower imagery cosmic aspects of nature including earth's relationships to the sun moon planets and stars formative creative forces of colours and their relationships to plant forms and finally working artistically and painting the Archetypal Plant motif itself In developing a broad overview the author forms a deeper more complete picture of the plant world paying homage to its diverse characteristics and stimulating new perceptions and perspectives This book is richly illustrated with full colour images
