Silverthorne, 2018-10-18 A 2019 Choice Outstanding Academic Title Opening with an account of print portraiture facilitating Franz Liszt's celebrity status and concluding with Riot Grrrl's noisy politics of feminism and performance this interdisciplinary anthology charts the relationship between music and the visual arts from late Romanticism and the birth of modernism to postmodernism while crossing from Western art to the Middle East Focused on music as a central experience of art and life these essays scrutinize the musicalisation of art focusing on the visual and performing arts and detailing significant instances of intra art relations between c 1840 and the present day Essays reflect on the aesthetic relationships of music to painting performance and installation sound and silence time and space The insistent influence of Wagner is considered as well as the work and ideas of Manet Satie and Cage Thomas Wilfred La Monte Young and Eliasson What distinguishes these studies are the convictions that music is never alone and that a full understanding of the isms of the last two hundred years is best achieved when music's influential presence in the visual arts is acknowledged and interrogated

Immigration Thomas Cieslik, David Felsen, Akis Kalaitzidis, 2008-11-30 The uncomfortable contemporary realities of immigration enmeshed as they are in economic human rights and national security issues have once again propelled foreign immigration to the United States toward the top of the list of U S domestic policy concerns Three respected authorities on immigration and international affairs here present a carefully calibrated history of U S immigration in primary source documents tracing the roots of the current debate in the history of our profoundly divided and surprisingly cyclical response to foreign immigration This book documents this national ambivalence identifying the major waves of immigration and clarifying the ways in which the existing social and political fabric conditioned both the response to the newcomers and their prospects of eventual integration into American society Part I introduces the historical record The early days of the Republic when most immigrants arrived from northern Europe The most important wave of immigration to the United States in the country's history over 1880 1920 when most immigrants arrived from Asia or from southern and eastern Europe Virulent post World War I anti immigration sentiment The World War II era absorption of huge numbers of displaced persons fleeing the misery and devastation of Europe Transition from a quota system to a preference system Heightened debate in the 1980s and 1990s The immigration policy repercussions of the terrorist attacks of September 11 2001 Part II takes up special issues in the contemporary immigration debate including the security debate and immigration immigration and the U S judiciary the immigration debate and the economy and the spectrum of public opinion on immigration revealed during the 2008 presidential election campaign The authors demonstrate that today's highly polarized immigration reform debate in many respects recapitulates the antagonisms and chaotic policies of the 1980s and 1990s when Ronald Reagan's Republican administration implemented an amnesty program while the state of California adopted the punitive Proposition 187 Paramount in today's immigration debate however are the homeland security concerns rendered acute by the 2001 bombing of the World Trade Center in New York City The controversial USA PATRIOT Act of 2001 and the Homeland Security Act of 2002 are among the documents surveyed in relation to the contemporary immigration debate
