Constitutional Law And Judicial Policy Making:

Making Policy, Making Law Mark Carlton Miller, Jeb Barnes, 2004 This volume proposes a new way of understanding the policymaking process in the United States by examining the complex interactions among the three branches of government executive legislative and judicial Collectively across the chapters a central theme emerges that the U S Constitution has created a policymaking process characterized by ongoing interaction among competing institutions with overlapping responsibilities and different constituencies one in which no branch plays a single static part At different times and under various conditions all governing institutions have a distinct role in making policy as well as in enforcing and legitimizing it This concept overthrows the classic theories of the separation of powers and of policymaking and implementation specifically the principal agent theory in which Congress and the presidency are the principals who create laws and the bureaucracy and the courts are the agents who implement the laws if they are constitutional The book opens by introducing the concept of adversarial legalism which proposes that the American mindset of frequent legal challenges to legislation by political opponents and special interests creates a policymaking process different from and more complicated than other parliamentary democracies The chapters then examine in depth the dynamics among the branches primarily at the national level but also considering state and local policymaking Originally conceived of as a textbook because no book exists that looks at the interplay of all three branches it should also have significant impact on scholarship about national lawmaking national politics and constitutional law Intro conclusion and Dodd s review all give good summaries

Decision Making by the Modern Supreme Court Richard L. Pacelle, Jr, Brett W. Curry, Bryan W. Marshall, 2011-06-13 There are three general models of Supreme Court decision making the legal model the attitudinal model and the strategic model But each is somewhat incomplete This book advances an integrated model of Supreme Court decision making that incorporates variables from each of the three models In examining the modern Supreme Court since *Brown v Board of Education* the book argues that decisions are a function of the sincere preferences of the justices the nature of precedent and the development of the particular issue as well as separation of powers and the potential constraints posed by the president and Congress To test this model the authors examine all full signed civil liberties and economic cases decisions in the 1953-2000 period

Decision Making by the Modern Supreme Court argues and the results confirm that judicial decision making is more nuanced than the attitudinal or legal models have argued in the past

Wrightsman, 2012-12-06 In the mid 1970s as a social psychologist dedicated to the application of knowledge I welcomed our field's emerging interest in the legal system I have always been fascinated by jury trials something about the idea that two con ceptions of the truth were in irrevocable conflict and jurors could choose only one of them More important the criminal justice system is a major social force that has been ignored by social psychologists for most of the twentieth century As I systematically began to explore the applications of social psycho logical concepts to the law 20 years ago I experienced the delight of discovery similar to that of a child under a Christmas tree It has been satisfying to be among the cohort of researchers who have studied the legal system especially trial juries from a psychological perspective I believe we have learned much that would be useful if the system were to be revised Hlf the system were to be revised there s the rub As I have stated my original motivation was the application of knowledge Like other social scien tists I believed perhaps arrogantly that the results of our research efforts could be used to make trial juries operate with more efficiency accuracy and satisfaction Qver the last two decades much knowledge has accumulated How can we put this knowledge to work Judges are the gatekeepers of the legal system
