Courthouse Martin R. West, Joshua Dunn, 2010-02-01 A Brookings Institution Press and the Thomas B Fordham Institute
publication From race to speech from religion to school funding from discipline to special education few aspects of education
policy have escaped the courtroom over the past fifty years Predictably much controversy has ensued Supporters of
education litigation contend that the courts are essential to secure student and civil rights while critics insist that the courts
distort policy and that the mere threat of litigation undermines the authority of teachers and administrators From
Schoolhouse to Courthouse brings together experts on law political science and education policy to test these claims Shep
Melnick Boston College and James Ryan University of Virginia School of Law draw lessons from judicial efforts to promote
school desegregation and civil rights Martha Derthick University of Virginia John Dinan Wake Forest University and Michael

management Finally editors Joshua Dunn and Martin R West probe the tangled relationship between religious freedom
student speech and school choice Subject Catalog of the Institute of Governmental Studies Library, University of
California, Berkeley University of California, Berkeley. Institute of Governmental Studies. Library, 1978 **Financing
Public Education in an Era of Change** Kenneth Forbis Jordan, Teresa S. Lyons, 1992 Diverse economic social and legal
concerns have brought renewed attention to the problem of financing public schools The primary economic concern is
preparing students to compete successfully in the international marketplace The change in demographics of the United
States also is a major social concern for education Legal concerns focus on school financing systems that are equitable to
students and taxpayers and on providing adequate school funding Despite complex state school financing formulas questions
remain about what to fund spending levels revenue sources and support from different levels of government The answers to
funding questions must be reached within the context of how schools function as well as the demographic political economic

social and legal factors influencing school funding This book is intended to help both educators and the general public better understand public school finance Chapter topics include the context for public school finance demographics and education school finance policy goals and outcomes state school finance equalization systems the courts and school finance taxation and sources of revenue for schools and issues in public school finance References accompany each chapter JPT

The Virginia State Constitution John Dinan, 2014-03-25 The Virginia State Constitution examines constitutional amendments court decisions attorney general opinions and legislative deliberations bearing on the development and interpretation of the Virginia Constitution The book contains a detailed history of the Virginia Constitution with particular attention to key moments in the state's constitutional development from the 1776 Constitution through the current 1971 Constitution The book also includes a provision by provision commentary on the evolution and meaning of each section of the Virginia Constitution The second edition brings this material up to date through mid 2013 and analyzes a number of constitutional developments with important implications for governance Among the recent amendments covered in this volume is an amendment barring recognition of same sex marriages and civil unions and an amendment that undertook a major revision of the provision limiting the eminent domain power The book examines several recent state court decisions of note including the state supreme court's first interpretation of the provision guaranteeing the right of the people to keep and bear arms and various court decisions limiting the power to levy taxes The book also analyzes recent attorney general opinions with significant implications for legislative appropriations to non profit groups along with various other legislative initiatives The Oxford Commentaries on the State Constitutions of the United States is an important series that reflects a renewed international interest in constitutional history and provides expert insight into each of the 50 state constitutions Each volume in this innovative series contains a historical overview of the state's constitutional development a section by section analysis of its current constitution and a comprehensive guide to further research Under the expert editorship of Professor G Alan Tarr Director of the Center on State Constitutional Studies at Rutgers University this series provides essential reference tools for understanding state constitutional law Books in the series can be purchased individually or as part of a complete set giving readers unmatched access to these important political documents

Financing Education in a Climate of Change Percy E. Burrup, 1977

Funding Public Schools Kenneth K. Wong, 1999 This book examines the fundamental role of politics in funding our public schools and fills a conceptual imbalance in the current literature in school finance and educational policy Unlike those who are primarily concerned about cost efficiency Kenneth Wong specifies how resources are allocated for what purposes at different levels of the government In contrast to those who focus on litigation as a way to reduce funding gaps he underscores institutional stalemate and the lack of political will to act as important factors that affect legislative deadlock in school finance reform Wong defines how politics has sustained various types of rules that affect the allocation of resources at the federal state and local level While these rules have been remarkably stable over the past twenty

to thirty years they have often worked at cross purposes by fragmenting policy and constraining the education process at schools with the greatest needs Wong s examination is shaped by several questions How do these rules come about What role does politics play in retention of the rules Do the federal state and local governments espouse different policies In what ways do these policies operate at cross purposes How do they affect educational opportunities Do the policies cohere in ways that promote better and more equitable student outcomes Wong concludes that the five types of entrenched rules for resource allocation are rooted in existing governance arrangements and seemingly impervious to partisan shifts interest group pressures and constitutional challenge And because these rules foster policy fragmentation and embody initiatives out of step with the performance based reform agenda of the 1990s the outlook for positive change in public education is uncertain unless fairly radical approaches are employed Wong also analyzes four allocative reform models two based on the assumption that existing political structures are unlikely to change and two that seek to empower actors at the school level The two models for systemwide restructuring aimed at intergovernmental coordination and or integrated governance would seek to clarify responsibilities for public education among federal state and local authorities above all integrating political and educational accountability The other two models identified by Wong shift control from state and district to the school one based on local leadership and the other based on market forces In discussing the guiding principles of the four models Wong takes care to identify both the potential and limitations of each Written with a broad policy audience in mind Wong s book should appeal to professionals interested in the politics of educational reform and to teachers of courses dealing with educational policy and administration and intergovernmental relations
