Markets, Constitutions, and Inequality Anna Chadwick, Eleonora Lozano-Rodríguez, Andrés Palacios-Lleras, Javier Solana, 2022-09-19 This interdisciplinary collection examines the significance of constitutions in setting the terms and conditions upon which market economies operate. With some important exceptions, most notably from the tradition of Latin American constitutionalism, scholarship on constitutional law has paid negligible attention to questions of how constitutions relate to economic phenomena. A considerable body of literature has debated the due limits of the exercise of executive and legislative power and discussions about legitimacy, democracy, and the adjudication of rights, civil and political, and socioeconomic, abound, yet scant attention has been paid by constitutional lawyers to the ways in which constitutions may protect and empower economic actors and to how constitutions might influence the regulation and governance of specific markets. The contributors to this collection mobilize insights from other disciplines, including economic theory, history, and sociology, and consider the relationship between constitutional frameworks and bodies of law, including property law, criminal law, tax law, financial regulation, and human rights law, to advance understanding of how constitutions relate to markets and to the political economy. This book's analysis of the role constitutions play in shaping markets will appeal to scholars and students in law, economics, history, politics, and sociology.

The Rise and Fall of the EU's Constitutional Treaty Finn Laursen, 2008-07-31 This book analyses the EU's Constitutional Treaty which emerged in draft form from the European Convention in the summer of 2003 and which was finalised by an Intergovernmental Conference (IGC) in June 2004. It describes the main novelties of the treaty and looks at policies of important actors: Member States and Community actors, the Commission and European Parliament, and the roles played by the Convention and the Italian and Irish Presidencies during the process of deliberation and negotiation that produced the treaty. It further studies the failure of ratification in France and the Netherlands and the implications for the process of European integration of this failure. It finally touches on the question whether a constitutional equilibrium has been reached. Since the new Lisbon Treaty negotiated in 2007 contains much of what was in the Constitutional Treaty, the analyses of the book remain pertinent for this latest EU treaty.
