Constructing Global Civil Society Morality And Power In International Relations:

Constructing Global Civil Society D. Chandler,2004-09-13 Global Civil Society is a crucial concept in International Relations today used as both a description of new mechanisms of non state actor and NGO engagement in international policy making and as a normative political project of international change David Chandler critically investigates the claims made by the advocates of global civil society analyzing the limits of the concept as a way of describing actual policy processes and the political dynamics behind the search for an international source of collective ethical values and social change

Constructing Global Civil Society David Chandler,2004-11-27 Chandler investigates the claims made by the advocates of global civil society analyzing the limits of the concept as a way of describing actual policy processes the political dynamics behind the search for an international source of collective ethical values social change

Global Civil Society Gideon Baker,David Chandler,2004-11-23 For many commentators global civil society is revolutionising our approach to global politics as new non state based and border free expressions of political community challenge territorial sovereignty as the exclusive basis for political community and identity This challenge from below to the nation state system is increasingly seen as promising nothing less than a reconstruction or a re imagination of world politics itself Whether in terms of the democratisation of the institutions of global governance the spread of human rights across the world or the emergence of a global citizenry in a worldwide public sphere global civil society is understood by many to provide the agency necessary for these hoped for transformations Global Civil Society asks whether this idea is such a qualitatively new phenomenon after all whether the transformation of the nation state system is actually within its reach and what some of the drawbacks might be

Hollow Hegemony David Chandler,2009-08-15 David Chandler explores the concept of global ideology and how it impacts on politics economics and development studies explaining why the global is such a damaging construction and exposing the political vacuum at the heart of common perceptions of global politics He argues that the pre eminence of the global whether in terms of global governance global security or global resistance is predicated on a lack rather than a presence It is the lack of clear sites and articulations of power the lack of clear security threats and the lack of clear political programmes or movements of resistance that drives the concept of international relations in global terms This wide ranging analysis is a perfect antidote for students frustrated with the abundant but vague literature on globalization

Encyclopedia of Global Justice Deen K. Chatterjee,2012-01-23 This two volume Encyclopedia of Global Justice published by Springer along with Springer s book series Studies in Global Justice is a major publication venture toward a comprehensive coverage of this timely topic The Encyclopedia is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars from around the world The wide ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry The Encyclopedia sets the tone and direction of this increasingly important area of scholarship for years to come The entries

number around 500 and consist of essays of 300 to 5000 words The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas

Human Security Mary Kaldor,2007-10-22 There is a real security gap in the world today Millions of people in regions like the Middle East or East and Central Africa or Central Asia where new wars are taking place live in daily fear of violence Moreover new wars are increasingly intertwined with other global risks the spread of disease vulnerability to natural disasters poverty and homelessness Yet our security conceptions drawn from the dominant experience of World War II and based on the use of conventional military force do not reduce that insecurity rather they make it worse This book is an exploration of this security gap It makes the case for a new approach to security based on a global conversation a public debate among civil society groups and individuals as well as states and international institutions The chapters follow on from Kaldors path breaking analysis of the character of new wars in places like the Balkans or Africa during the 1990s The first four chapters provide a context they cover the experience of humanitarian intervention the nature of American power the new nationalist and religious movements that are associated with globalization and how these various aspects of current security dilemmas have played out in the Balkans The last three chapters are more normative dealing with the evolution of the idea of global civil society the relevance of just war theory in a global era and the concept of human security and what it might mean to implement such a concept This book will appeal to all those interested in issues of peace and conflict in particular to students of politics and international relations

Civil Society Regionalization in Southern Africa Andréas Godsäter,2016-05-12 This book investigates civil society regionalization in Southern Africa The point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s However whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important gaps remain in particular the relatively scant emphasis given to civil society This particularly relates to regions in the global South including Southern Africa The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa both empirically and from a theoretical perspective through analysing the cases of trade and HIV AIDS The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and to a less extent making identities regional Furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization Lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa

Humanitarian Intervention After Kosovo Aidan Hehir,2008-10-09 A critical analysis of the record of global civil society and the normative thesis since NATO s intervention in Kosovo The book advances a new direction for the humanitarian intervention debate

[From Kosovo to Kabul and Beyond](#) David Chandler,2005-12-20 This new and updated edition of David Chandler s acclaimed book takes a critical look at the way

in which human rights issues have been brought to the fore in international affairs The UN and Nato's new policy of interventionism as shown in Iraq Somalia Bosnia Kosovo and East Timor has been hailed as part of a new ethical approach to foreign policy David Chandler offers a rigorous critique of this apparently benign shift in international relations to reveal the worrying political implications of a new human rights discourse He asks why the West can now prioritise the rights of individuals over the traditional rights of state sovereignty and why this shift has happened so quickly Charting the development of a human rights based foreign policy he considers the theoretical problems of defining human rights and sets this within the changing framework of international law Meticulous and compelling *From Kosovo to Kabul and Beyond* offers a disturbing insight into the political implications of a human rights led foreign policy and the covert agenda that it conceals

Empire in Denial David Chandler, 2006-07-20 Ideal for students of international affairs this book takes a critical look at state building

The Idea of Global Civil Society Randall Germain, Michael Kenny, 2004-08-02 This book evaluates the claim that in order to explore the changing social foundations of global power relations today we need to include in our analysis an understanding of global civil society particularly if we also wish to raise ethical questions about the changing political and institutional practices of transnational governance Bridging the normative concerns of political theorists with the historical and institutional focus of scholars of international relations and international political economy this book is of broad interest to students and researchers concerned with international relations civil society global governance and ethics

The British National Bibliography Arthur James Wells, 2004 *From Kosovo to Kabul* David Chandler, 2002 Having written widely about human rights and international relations Chandler does not here attempt a history of them or their interrelationship Rather he analyzes why the ethical agenda of human rights has become widely accepted since 1990 and indicates areas in which there appear to be limitations or at least important questions over the implications of this shift in approach Distributed in the US by Stylus Annotation copyrighted by Book News Inc Portland OR
