Constructs Two:

Green Initiatives for Business Sustainability and Value Creation Paul, Arun Kumar, Bhattacharyya, Dipak Kumar, Anand, Sandip, 2017-06-19 Sustainability has become an unavoidable topic in modern society. In order for sustainable development to be fully achieved, it must be integrated into the planning and measurement systems of business enterprises. *Green Initiatives for Business Sustainability and Value Creation* is an essential reference source including the most recent scholarly research on the development and application of green business models for contemporary organizations with a focus on possible contexts and constructs of closed loop supply chain management. Featuring extensive coverage on topics such as consumption behavior, political economy, and structural modeling, this book is ideally designed for academicians, researchers, and professionals seeking current research on the importance of strategic green business practices. **Classroom**

Collaboration Phillida Salmon, Hilary Claire, 2020-03-09 Originally published in 1984, this is an account of a two-year study of four comprehensive school classrooms where teachers were fostering collaborative learning methods. The authors draw on their joint knowledge and experience as a psychologist and a teacher to give an insight into pupils' perceptions of their schooling and a dynamic analysis of the process of education that they experienced. Working on the premise that successful collaboration demands common goals and mutual understanding, the author observed pupils at work, transcribed their talk, and carried out interviews with both pupils and their teachers. They show how individual children can support and learn from each other, document the social and psychological features underlying the use or non-use of collaboration, and take the teachers' own frames of reference as a standpoint in evaluating success. The authors' findings were intended to encourage teachers to move away from the traditional view of education as the transmission of knowledge to passive pupils. Social relationships within the classroom can potentially be not merely a source of disruption but the basis of learning itself. This possibility is particularly significant in the context of inner city schools where there is often mutual mistrust and hostility across lines of race, class, gender, or ability. **Inter-organizational information exchange, supply chain compliance**

and performance Guangqian Peng, 2023-09-04 Globalization of business markets and the rapid development of information technology are making information management more and more important. By combining managerial and economic theory, this book builds a framework to demonstrate facilitating factors for inter-organizational information exchange and the effects of information exchange on supply chain compliance and business performance. We have strong indications, both theoretical and empirical, that such an integrative conceptual framework is needed to grasp the complexity of information exchange between business partners. Using empirical evidence from the poultry chain in Mainland China, this book supports the complementary roles between contractual governance and trust in the process of improving the willingness to communicate. It also proposes that communication quality needs to be broader than information quality. Finally, it illustrates that, in order to stand out from main competitors, companies should not only commit to realizing more potential communication benefits for

themselves but also for their main partners Different solutions for buyers and suppliers in optimizing their business performance are also discussed This book is recommended for a broad audience of professionals practitioners and policy makers who concern themselves with information management supply chain management channel relationship management and performance management *Struggling for Autonomy in Language Education* Flávia Vieira,2009 Pedagogy for autonomy is a continuous struggle for transformative and empowering education That struggle entails reflecting on what fosters or hinders teacher and learner development acting towards challenging and reshaping oppressive forces and circumstances and being willing to deal with complexity uncertainty and risk taking without losing one's hopes and ideals Our main purpose is to present and discuss ways in which critical reflecting acting and being emerge in contexts of teaching and or teacher education not as realisations of a grand theory of pedagogy for autonomy but rather as local idiosyncratic struggles to grasp and enhance the meanings that autonomy may not take in diverse educational settings Although from different angles the chapters highlight the central role of teacher and learner development as interrelated aspects of pedagogy for autonomy in language education Health and safety issues of employees in family firms Muhammad Waseem Bari,Ramayah T,Francesca Di Virgilio,Emilia Alaverdov,2023-03-07 **Mount St. Helens National Volcanic Monument**,1984 **The Oxford Handbook of Personality and Psychopathology Assessment** Joni L.
