When Languages Die K David Harrison, 2008-07-21 It is commonly agreed by linguists and anthropologists that the majority of languages spoken now around the globe will likely disappear within our lifetime The phenomenon known as language death has started to accelerate as the world has grown smaller This extinction of languages and the knowledge therein has no parallel in human history K David Harrison's book is the first to focus on the essential question what is lost when a language dies What forms of knowledge are embedded in a language's structure and vocabulary And how harmful is it to humanity that such knowledge is lost forever Harrison spans the globe from Siberia to North America to the Himalayas and elsewhere to look at the human knowledge that is slowly being lost as the languages that express it fade from sight He uses fascinating anecdotes and portraits of some of these languages last remaining speakers in order to demonstrate that this knowledge about ourselves and the world is inherently precious and once gone will be lost forever This knowledge is not only our cultural heritage oral histories poetry stories etc but very useful knowledge about plants animals the seasons and other aspects of the natural world not to mention our understanding of the capacities of the human mind Harrison's book is a testament not only to the pressing issue of language death but to the remarkable span of human knowledge and ingenuity It will fascinate linguists anthropologists and general readers

Hearsay Is Not Excluded Michael R. Dove, 2024-02-27 This chronicle of natural history argues that the modern environmental crisis and rise in science skepticism codeveloped with the rise of ever narrower scientific disciplines For millennia the field of natural history promoted a knowledgeable and unifying view of the world In contrast the modern rise of narrow scientific disciplines has promoted a dichotomy between nature and culture on the one hand and between scientific and folk knowledge on the other Drawing on the fields of anthropology history and environmental science Michael R Dove argues that the loss of this historic holistic vision of the world is partly to blame for contemporary environmental degradation and science skepticism Dove bases this thesis on a study of four pioneering natural historians across four centuries Georg Eberhard Rumphius seventeenth century Carl Linnaeus eighteenth century Alfred Russel Wallace nineteenth century and Harold C Conklin twentieth century Dove studies their field craft and writing the political cultural and environmental circumstances in which they worked the sources of their insight and the implications of their work for modern society Most of all the book seeks to discover what enabled those natural historians to straddle boundaries that today seem impassable and to distill that wisdom
