**Conspiring with Forms** Terry Caesar, 1992 Breaking the silence on a number of sacrosanct aspects of higher education and now and then raising a clamour about some highly politicised issues *Conspiring with Forms* is a critique of both the academy and the current discourse concerning its purposes and direction *Postcolonial Theory and Autobiography* David Huddart, 2008-04-18 Cultural theory has often been criticized for covert Eurocentric and universalist tendencies Its concepts and ideas are implicitly applicable to everyone ironing over any individuality or cultural difference Postcolonial theory has challenged these limitations of cultural theory and *Postcolonial Theory and Autobiography* addresses the central challenge posed by its autobiographical turn Despite the fact that autobiography is frequently dismissed for its Western masculine bias David Huddart argues for its continued relevance as a central explanatory category in understanding postcolonial theory and its relation to subjectivity Focusing on the influence of post structuralist theory on postcolonial theory and vice versa this study suggests that autobiography constitutes a general philosophical resistance to universal concepts and theories Offering a fresh perspective on familiar critical figures like Edward W Said and Gayatri Chakravorty Spivak by putting them in the context of readings of the work of Jacques Derrida Gilles Deleuze and Alain Badiou this book relates the theory of autobiography to expressions of new universalisms that together with postcolonial theory rethink and extend norms of experience investigation and knowledge *Gypsy Scholars, Migrant Teachers and the Global Academic Proletariat* Rudolphus Teeuwen, Steffen Hantke, 2007 Once adjunct teaching was considered a temporary solution to faculty shortages in institutions of higher education Now it a permanent and indispensable feature of such institutions not just in the U S but worldwide This book takes stock of this new development concentrating primarily on the situation in the humanities It looks at its impact on the lives of the highly educated scholars and teachers from many parts of the world scholars waking up to the sobering fact that higher education presents them with a two tiered labour market in which they themselves are permanently barred from moving up to the higher tier To them being an adjunct teacher means experiencing frustration and humiliation All essays in this book offer personal accounts of adjuncts experiences together with critical reflections on institutional conditions and suggestions for their improvement In turn defiant poignant analytical exasperated and sardonic these essays are always incisive and revealing Their inside view a view from below shows higher education as a world different from how it appears to tenured professors and university administrators different from that presented in most college brochures For all those who care about the current state and the future of higher education no matter if they are teachers scholars students parents or administrators this book will offer valuable insights into the working world of academic teaching **BOOK JACKET** [Book Parts](#) Dennis Duncan, Adam Smyth, 2019-06-27 What would an anatomy of the book look like There is the main text of course the file that the author proudly submits to their publisher But around this hemming it in on the page or enclosing it at the front and back of the book there are dozens of other texts page numbers and running heads

copyright statements and errata lists each possessed of particular conventions each with their own lively histories To consider these paratexts recalling them from the margins letting them take centre stage is to be reminded that no book is the sole work of the author whose name appears on the cover rather every book is the sum of a series of collaborations It is to be reminded also that not everything is intended for us the readers There are sections that are solely directed at others binders librarians lawyers parts of the book that if they are working well are working discreetly like a theatrical prompt whispering out of the audience's ear shot Book Parts is a bold and imaginative intervention in the fast growing field of book history it pulls the book apart Over twenty two chapters Book Parts tells the story of the components of the book from title pages to endleaves from dust jackets to indexes and just about everything in between Book Parts covers a broad historical range that runs from the pre print era to the digital bringing together the expertise of some of the most exciting scholars working on book history today in order to shine a new light on these elements hiding in plain sight in the books we all read

**The Last Professors** Frank Donoghue, 2018-04-03 What makes the modern university different from any other corporation asked Columbia's Andrew Delbanco recently in the New York Times There is more and more reason to think less and less he answered In this provocative book Frank Donoghue shows how this growing corporate culture of higher education threatens its most fundamental values by erasing one of its defining features the tenured professor Taking a clear eyed look at American higher education over the last twenty years Donoghue outlines a web of forces social political and institutional dismantling the professoriate Today fewer than 30 percent of college and university teachers are tenured or on tenure tracks and signs point to a future where professors will disappear Why What will universities look like without professors Who will teach Why should it matter The fate of the professor Donoghue shows has always been tied to that of the liberal arts with the humanities at its core The rise to prominence of the American university has been defined by the strength of the humanities and by the central role of the autonomous tenured professor who can be both scholar and teacher Yet in today's market driven rank and ratings obsessed world of higher education corporate logic prevails faculties are to be managed for optimal efficiency productivity and competitive advantage casual armies of adjuncts and graduate students now fill the demand for teachers Bypassing the distractions of the culture wars and other crises Donoghue sheds light on the structural changes in higher education the rise of community colleges and for profit universities the frenzied pursuit of prestige everywhere the brutally competitive realities facing new Ph D's that threaten the survival of professors as we've known them There are no quick fixes in The Last Professors rather Donoghue offers his fellow teachers and scholars an essential field guide to making their way in a world that no longer has room for their dreams First published in 2008 The Last Professors have largely had its arguments borne out in the interim as the

percentage of courses taught by tenured professors continues to dwindle This new edition includes a substantial Preface that elaborates on recent developments and offers tough but productive analysis that will be crucial for today s academics to heed

**Traveling through the Boondocks** Terry Caesar,2000-07-03 What is it like to be a faculty member at a university in the United States that enjoys no reputation or distinction Traveling through the Boondocks discusses this situation not from the top down but from the bottom up where the experience of exclusion ranges from that of departments where scholarship gets to count in hiring decisions to conferences where only individuals from elite institutions get to appear on stage This book reinvigorates our understanding of higher education by illuminating the everyday conditions under which academics work and the hierarchical distinctions in which they are always embedded **The Best Books for Academic Libraries** ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers

Goode,1998 *Saying And Silence* Frank Farmer,2001-03 In composition studies for the last two or three decades Bakhtin has been especially influential through his theories of language dialogue and genre His work is required reading in upper division and graduate rhetoric courses and is included in the recent major surveys if rhetoric Frank Farmer has contributed important essays to the study of Bakhtin in composition and in *Saying and Silence* he gathers some of those along with several new essays into a single volume Scholars who specialize in Bakhtin will find this work engaging but equally Farmer wants to explicate and apply Bakhtin for readers whose focus is teaching or some other nonspecialist dimension of writing scholarship Farmer explores the relationship between the meaningful word and the meaningful pause between saying and silence especially as the relationship emerges in our classrooms our disciplinary conversations and encounters with publics beyond the academy Each of his chapters here addresses some aspect of how we and our students colleagues and critics have our say and speak our piece often under conditions where silence is the institutionally sanctioned and preferred alternative He has enlisted a number of Bakhtinian ideas the superaddressee outsideness voice in dialogue to help in the project of interpreting the silences we hear naming the silences we do not hear and of encouraging all silences to speak in ways that are freely chosen not enforced What he offers then is a compact collection that addresses major areas of Bakhtinian thought and influence on composition practice to date And he does this in a voice and style that will be accessible to the general scholar as well as the specialist and will be suitable

for use with the advanced composition student too
