

# Constraint Processing: Overview

- ⊙ Illustrating the idea with examples:
  - Numerical constraint nets, Spreadsheets
- ⊙ Defining constraint problems
- ⊙ Techniques for solving them:
  - A variety of backtracking techniques
  - Consistency and relaxation
  - Hybrid constraint techniques
- ⊙ Some applications:
  - Understanding line drawings
  - Disambiguating natural language

*Constraint Processing* Rina Dechter, 2003-05-05 Constraint reasoning has matured over the last three decades with contributions from a diverse community of researchers in artificial intelligence databases and programming languages operations research management science and applied mathematics In *Constraint Processing* Rina Dechter synthesizes these contributions as well as her own significant work to provide the first comprehensive examination of the theory that underlies constraint processing algorithms

**Constraint Processing** Rina Dechter, 2003-05-22 Constraint satisfaction is a simple but powerful tool Constraints identify the impossible and reduce the realm of possibilities to effectively focus on the possible allowing for a natural declarative formulation of what must be satisfied without expressing how The field of constraint reasoning has matured over the last three decades with contributions from a diverse community of researchers in artificial intelligence databases and programming languages operations research management science and applied mathematics Today constraint problems are used to model cognitive tasks in vision language comprehension default reasoning diagnosis scheduling temporal and spatial reasoning In *Constraint Processing* Rina Dechter synthesizes these contributions along with her own significant work to provide the first comprehensive examination of the theory that underlies constraint processing algorithms Throughout she focuses on fundamental tools and principles emphasizing the representation and analysis of algorithms Examines the basic practical aspects of each topic and then tackles more advanced issues including current research challenges Builds the reader's understanding with definitions examples theory algorithms and complexity analysis Synthesizes three decades of researchers work on constraint processing in AI databases and programming languages operations research management science and applied mathematics

*Constraint Processing* Manfred Meyer, 1995-06-20 This volume contains 15 thoroughly refereed full research papers selected from the presentations given during two workshops on constraint processing these workshops were held in conjunction with the International Congress on Computer Systems and Applied Mathematics St Petersburg Russia July 1993 and the European Conference on Artificial Intelligence Amsterdam The Netherlands August 1994 This volume essentially contributes to integrating the different approaches to the young and very active field of constraint processing by offering papers from logic programming knowledge representation expert systems theoretical computer science operations research and other fields Among contributions are two surveys by Podelski and van Roy and by Freuder
