## **Constructing Social Psychology:**

Constructing Social Psychology William James McGuire, 1999-03-28 This collection of papers by William J McGuire reports research on the phenomenal self revealing how we selectively perceive ourselves and other complex stimuli in terms of distinctive or atypical features often noticing what is missing rather than what is there The content structure and processing of thought systems surrounding the self and other complex stimuli are shown to function by balancing logical consistency realistic coping and hedonic gratification Attitude change and social influence processes are described with particular attention given to the personality correlates of persuasability how beliefs can be immunized against persuasion how persuasive communications affect beliefs and how people can be persuaded by Socratic questioning that does not give them new information but rather directs their attention to information they already have Also reported are findings on language and thought psychology and history and techniques of creative thinking in psychology and other fields **Social Cognition** Herbert Bless, Klaus Fiedler, Fritz Strack, 2004 This introductory textbook provides the student with comprehensive coverage of the core topics in the field of social cognition **Constructing the Social** Theodore R Sarbin, John I Kitsuse, 1994-01-21 This comprehensive volume explores the concrete implications of social constructionist theory and provides a clear overview of how to do social constructionist research and analysis Leading psychologists and sociologists ground theory with practical examples to clearly illustrate the view that human beings are principally social agents rather than passive reactors or information processors Each chapter analyzes the historical and cultural contexts implicit in a wide range of key issues including anxiety the family intelligence ageing and depression Social Cognition Greifeneder Rainer [VNV], Herbert Bless, Klaus Fiedler, 2018 The new and fully updated edition of this successful introductory textbook provides the student with comprehensive coverage of the core topics in the field of social cognition one of the most important and influential areas of contemporary social psychology **An Introduction to Social Psychology** Charles Abram Ellwood, 1917 Journal of Abnormal and Social Psychology Morton Prince, 1927 *The Journal of Abnormal and Social Psychology*, 1927 *The Oxford Handbook of Group and Organizational Learning* Linda Argote, John M. Levine, 2020-01-02 Groups and organizations vary dramatically in their ability to learn Some acquire substantial knowledge as a function of experience while others do not In groups learning can occur at the level of the individual member and or the group as a whole In organizations learning can occur at both of these levels as well as that of the wider collective Besides varying in the amount and kind of information they acquire groups and organizations also vary regarding their success in retaining knowledge and transferring it to other units In general groups and organizations that are proficient in acquiring retaining and transferring knowledge are more productive and more enduring than their less able counterparts The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by leading scholars from several disciplines Because many of the same processes influence learning in groups and organizations

including both kinds of learning in the same volume has the potential to facilitate the integration of knowledge and the cross fertilization of ideas These benefits are reciprocal in that research at the group level can shed light on how organizations learn whereas research at the organizational level can illuminate how groups learn By clarifying similarities and differences in the processes that underlie learning in groups and organizations the handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity *Building Global Mindsets* C. Bouquet,2004-11-30 Today s multinational enterprises are headed for trouble unless their top level executives manage to pay the appropriate amount of attention to what is happening in the farther corners of the business world With trillions of internal company documents circulating in corporate offices everyday it s easy to lose sight of priorities by concentrating on the wrong signals Drawing from compelling research Bouquet describes the attention practices of 136 global firms thereby shedding new light on the relationship between global mindsets and overall company performance **The Routledge International Handbook of Interactionism** Dirk vom Lehn,Natalia Ruiz-Junco,Will Gibson,2021-05-26 The Routledge International Handbook of Interactionism demonstrates the promise and diversity of the interactionist perspective in social science today providing students and practitioners with an overview of the impressive developments in interactionist theory methods and research Thematically organized it explores the history of interactionism and the contemporary state of the field considering the ways in which scholars approach topics that are central to interactionism As such it presents discussions of self identity gender and sexuality race emotions social organization media and the internet and social problems With attention to new developments in methods and methodologies including digital ethnography visual methods and research ethics the authors also engage with new areas of investigation that have emerged in light of current societal developments such as policing and police violence interactionism beyond binaries and social media Providing a comprehensive overview of the current state and possible future of interactionist research it will appeal to interactionist scholars as well as to established sociologists and students of sociology who have an interest in latest developments in interactionism **Communication Yearbook 4** Dan Nimmo,1980-01-01 **The Quarterly Journal of Economics** Charles Franklin Dunbar, Frank William Taussig, Abbott Payson Usher, Alvin Harvey Hansen, William Leonard Crum, Edward Chamberlin, Arthur Eli Monroe, 1923 Vols 1 22 include the section Recent publications upon economics **Evaluating Public Communication** Jim Macnamara,2017-09-05 Evaluating Public Communication addresses the widely reported lack of rigorous outcome and impact oriented evaluation in advertising public relations corporate government political and organizational communication and specialist fields such as health communication This transdisciplinary analysis integrates research literature from each of these fields of practice as well as interviews content analysis and ethnography to identify the latest models and approaches Chapters feature a review of 30 frameworks and models that inform processes for evaluation in communication including the latest recommendations of industry bodies evaluation councils and research institutes in several countries recommendations for standards based on

contemporary social science research and industry initiatives such as the IPR Task Force on Standards and the Coalition for Public Relations Research Standards an assessment of metrics that can inform evaluation including digital and social media metrics 10 informal research methods and over 30 formal research methods for evaluating public communication evaluation of public communication campaigns and projects in 12 contemporary case studies Evaluating Public Communication provides clear guidance on theory and practice for students researchers and professionals in PR advertising and all fields of communication
