Routledge Handbook of Environmental Journalism David B. Sachsman,JoAnn Myer Valenti,2020-05-14 The Routledge Handbook of Environmental Journalism provides a thorough understanding of environmental journalism around the world An increasing number of media platforms from newspapers and television to Internet social media networks are the major providers of indispensable information about the natural world and environmental risk Despite the dramatic changes in the news industry that have tended to reduce the number of full time newspaper reporters environmental journalists remain key to bringing stories to light across the globe With contributions from around the world broken down into five key regions the United States of America Europe and Russia Asia and Australia Africa and the Middle East and South America this book provides support for today s environment reporters the providers of essential news in the 21st century As a scholarly and journalistic work written by academics and the environmental reporters themselves this volume is an essential text for students and scholars of environmental communication journalism and global environmental issues more generally as well as professionals working in this vital area

Communication and Environment: Sustainability and Risks (Penerbit USM) Hamidah Abd. Hamid,Azman Azwan Azmawati,Jamilah Hj. Ahmad,Nik Norma Nik Hasan,2014-11-25 There is a dearth of literature on environmental communication within the non western world The few

existing ones are scattered and not easily available Thus there is a dire need to document research and literature in the field The opportunity arose at the 2009 International Conference on Communication and Environment held in Penang Malaysia The international conference with the theme Transformation for a Sustainable Tomorrow organised by the School of Communication Universiti Sains Malaysia USM attracted scholars practitioners and activists from around the world to listen and deliberate on various aspects of communication and environment The post conference review resulted in the selection of 24 papers to be compiled into this edited volume The escalating degradation of environment locally and globally was the main concern that prompted discussions on how sustainability can be advocated The development process in many countries economic activities and political decisions on issues such as deforestation for timber logging rapid urbanisation pertinently points out that environmental degradation and any communication on environmental change has to be grounded and located within the wider context of social politics and economics of the society Communication and environmental communication for that matter have also to be understood within these wider contexts Many would agree that a constant and consistent flow of information communicated through different channels to different stakeholders at the right time and destinations can help raise awareness and consciousness of environmental problems protection and preservation This vital information can enable the public and stakeholders to make informed choices and take actions whenever possible A lack of communication and information will inordinately exacerbate the situation of environmental degradation This book thus highlights how the environment is being treated in the media communicated to the society and impacted nations The chapters are grouped into the following sections Theoretical and conceptual issues Media content and the environment Politics communication and the environment Corporate social and environmental responsibility and Citizen participation human rights and the environment The editors acknowledge the excellent contributions of all the authors and are indebted to the members of the review panel the external reviewer USM Publications Committee and staff of Universiti Sains Malaysia Press for their help in ensuring the quality of this volume Most importantly we express our gratitude to USM for providing the financial support for the international conference and making it possible to publish this book The Editors January 2012 Universiti Sains Malaysia Penerbit Universiti Sains Malaysia *Covering the Environment* John Corner, Philip Schlesinger, 1991 **Environmental Impact Assessment** Chris Wood, 2014-01-14 Environmental Impact Assessment EIA has become a vital management tool worldwide EIA is a means of evaluating the likely consequences of a proposed major action which will significantly affect the environment before that action is taken This new edition of Wood s key text provides an authoritative international review of environmental impact assessment comparing systems used in the UK USA the Netherlands Canada the Commonwealth of Australia and New Zealand and South Africa **Office Design: a Study of Environment** Pilkington Research Unit, 1965 **Geospatial Technology for Environmental Hazards** Pravat Kumar Shit, Hamid Reza Pourghasemi, Gouri Sankar Bhunia, Pulakesh Das, Adimalla Narsimha, 2021-12-02 The book demonstrates the geospatial technology approach to data

mining techniques data analysis modeling risk assessment visualization and management strategies in different aspects of natural and social hazards This book has 25 chapters associated with risk assessment mapping and management strategies of environmental hazards It covers major topics such as Landslide Susceptibility Arsenic Contaminated Groundwater Earthquake Risk Management Open Cast Mining Soil loss Flood Susceptibility Forest Fire Risk Malaria prevalence Flood inundation Socio Economic Vulnerability River Bank Erosion and Socio Economic Vulnerability The content of this book will be of interest to researchers professionals and policymakers whose work involves environmental hazards and related solutions **Framing an Environmental Controversy in India's English-language Press** Elizabeth Ann Burch,1997
