## Chain Of Being:

*The Great Chain of Being* Arthur O. Lovejoy, 1936 From later antiquity to the close of the 18th century most educated men accepted without question a traditional view of the plan and structure of the world In this volume Lovejoy copiously illustrates the influence of this conception and of the ideas out of which it was compounded upon the imagination and feelings as expressed in literature

*The Great Chain of Being* Arthur Lovejoy, 2017-07-12 This is arguably the seminal work in historical and philosophical analysis of the twentieth century Originally delivered for the William James lecture series at Harvard University in 1932-33 it remains the cornerstone of the history of ideas Lovejoy sees philosophy's history as one of confusion of ideas a prime example of which is the idea of a great chain of being a universe linked in theology science and values by pre-determined stages in all phases of life Lovejoy's view is one of dualities in nature and society with both error and truth as part of the natural order of things The past reminds us that the ruling modes of thought of our own age which we may view as clear coherent and firmly grounded are unlikely to be seen with such certainty by posterity The Great Chain of Being is an excursion into the past with a clear mission to discourage the assumption that all is known or that what is known is not subject to modification at a later time Lovejoy reaffirms the intrinsic worth of diversity as a caution against certitude By this he does not mean toleration of indifference or relativity for its own sake but an appreciation of mental and physical process of human beings As Peter Stanlis notes in his introduction Faith in the great chain of being was finally largely extinguished by the combined influences of Romantic idealism Darwin's theory of evolution and Einstein's theory of relativity Few books remain as alive to prospects for the future by reconsidering follies of the past as does Lovejoy's stunning work

**The Great Chain of Being and Italian Phenomenology** A.A. Bello, 2012-12-06 The Center maintained its international contacts in 1979 by inviting numerous foreign scholars to the National Conference at Viterbo including H Kochler Austria R Magliola U S A J C Piguet Switzerland M R Barral U S A and M Petit France and also by extending hospitality at its April Seminar held at the Teacher Training Faculty of Rome University to Prof H Meyn of The World Phenomenology Institute who spoke on His toricism and the Idea of Philosophy as a Rigorous Science The activities organized by The Italian Center since its foundation have given a considerable new impulse to phenomenological research in Italy They have made established contacts between numerous Italian scholars who previously worked in isolation without a continued and effective exchange of the results of their researches and they have also strengthened and extended relations with the international phenomenological community thereby creating a cultural pattern of cooperation which becomes more and more concrete and fruitful

*Broken Chain of Being* Christopher R. Rossi, 1998-01-01 Part detective story part intellectual history of the rise of international law and part critique this original thoughtful work offers readers both a fresh perspective on important historical developments in international law and a new level of comprehension and guidance into its future Understanding the development of international law and its connection to morality contributes to an assessment of the

problems and prospects of international law today Using James Brown Scott the controversial American international lawyer as a vehicle the author engages in a probing examination of perspectives on the workings of the legal order centered on the concept of plenitudinism a multi layered expression of the idea of fullness in the international legal system This challenging work provides revealing insights about the past the failings and the possibilities in international law particularly in the field of enforcement of human rights

*All Men and Both Sexes* Hilda L. Smith, 2002 *All Men and Both Sexes* explores the use of such universal terms as people man or human in early modern England from the civil war through the Enlightenment Such language falsely implies inclusion of both men and women when actually it excludes women Recent scholarship has focused on the Rights of Man doctrine from the Enlightenment and the French Revolution as explanation for women's exclusion from citizenship According to Hilda Smith we need to go back further to the English Revolution and the more grounded but equally restricted values tied to the free born Englishman Citing educational treatises advice literature to young people guild records popular periodicals and parliamentary debates she demonstrates how the male maturation process came to define the qualities attached to citizenship and responsible adulthood which in turn became the basis for modern individualism and liberalism By the eighteenth century a new discourse of sensibility was describing women as dependent beings outside the state in a separate sphere and in need of protection This excluded women from reform debates forcing them to seek not an extension of a democratic franchise but a specific women's suffrage focused on gender difference

**Beyond Dichotomies** Elisabeth Mudimbe-Boyi, 2002-07-17 Confronts the cultural challenges of globalization

**On Animals** David L. Clough, 2012-02-02 This volume is a project in systematic theology a rigorous engagement with the Christian tradition in relation to animals under the doctrinal headings of creation reconciliation and redemption and in dialogue with the Bible and theological voices central to the tradition The book shows that such engagement with the tradition with the question of the animal in mind produces surprising answers that challenge modern anthropocentric assumptions For the most part therefore the novelty of the project lies in the questions raised rather than the proposal of innovative answers to it The transformation in our thinking about animals for which the book argues results in the main from looking squarely for the first time at the sum of what we are already committed to believing about other animals and their place in God's creation

*Race and Aesthetics in the Anthropology of Petrus Camper (1722-1789)* Miriam Claude Meijer, 1999 After the discovery of the anthropoid ape in Asia and in Africa eighteenth century Holland became the crossroads of Enlightenment debates about the human species Material evidence about human diversity reached Petrus Camper comparative anatomist in the Netherlands who engaged among many other interests in menschkunde Could only religious doctrine support the belief of human demarcation from animals Camper resolved the challenges raised by overseas discoveries with his thesis of the facial angle a theory which succeeding generations distorted and misused in order to justify slavery racism antisemitism and genocide Thanks to his abundant papers in Dutch archives Camper's ideas are restored to their original state Eighteenth century
