1. Introduction

The disciplinary problem among the students is one of the big challenges for education in our country nowadays. The problem becomes serious when the students lost their moral compass to discern what is right and wrong for their actions in school or out of the school. It is undeniable that the problem is due to the low morality level among the students. Morality is principles that concern the difference between right and wrong action or good and bad behavior. Morality is important and needed to be taught in school to produce students who are balanced and harmonious in intellectual, spiritual, emotional and physical aspects based on the National Philosophy of Education.

When the discipline issue arises, besides the parents, the role of teachers in developing morality of students will be questioned in the society since their expectation on teachers' responsibilities is high nowadays. The responsibilities of teachers are not only teaching students, but also helping students to develop in every aspect including morality.

Nowadays, the role of teachers becomes more challenging. They are the second parents of their students who take their responsibilities in educating and taking care of the students in the school. The expectation on the teachers is getting higher especially when the students are exposed to a variety of resources, social media and gadgets in this era. According to Morgan (2016), students spend too much time online and this will affect their moral development.
