Journal of Intellectual & Developmental Disability ,2001 Learning Disabilities and Challenging Behaviors Nancy

Mather, Sam Goldstein, 2008 The second edition of the comprehensive accessible textbook is a practical guide to how learning disabilities affect behavior and what to do about it Severe Learning Disabilities and Challenging Behaviours Eric Emerson, Peter McGill, Jim Mansell, 2013-11-11 This is a timely book The question of how to help people with challenging behaviour and how to design and manage services so that staff families and users feel that what should be done is being done is at the top of the agenda Failure to deal competently with the issue results in disaffection poor quality services and a less than optimal quality of life for service users Moreover the credibility of services for all people with learning disabilities is intimately connected with how we cope with challenging behaviour a point made recently by a Department of Health Working Group chaired by Jim Mansell Department of Health 1993 The book is welcome because it draws together what is known about the important questions from a British perspective although of course most of the underlying issues have world wide relevance The contributors while all having a good deal of experience and authority do not put forward simple portrayals of the problems nor glib solutions and this is one of the book's major strengths Clarity in the field of challenging behaviour is sometimes elusive What is presented here forces the reader to confront arguments in a rational and logical fashion **Working with Staff to Overcome Challenging Behavior Among People who Have Severe Disabilities** Dennis H. Reid, Marsha B. Parsons, 2002 A step by step approach for ensuring support plans are carried out appropriately and effectively **Reduce Challenging Behaviors and Enhance Functioning in Youth with an Intellectual Disability** Brett Ally Stone, 2018 Approximately 1.8% of students in the public school system have an intellectual disability or Autism Spectrum Disorder These disabilities cause impairment in multiple domains of functioning If these students also have challenging behaviors such as noncompliance aggression and stereotypies these behaviors have been found to cause impairment over and beyond those of the core symptoms associated with the disability Challenging behaviors in youth with developmental disabilities do not typically subside on their own and need intervention Thankfully there are evidence based behavioral interventions for individuals with developmental disabilities to reduce challenging behaviors and increase more functional behaviors including Applied Behavioral Analysis Functional Behavioral Analysis and School Wide Positive Behavioral Support and Interventions SWPBIS There has been much research and positive effects found on the effectiveness of behavioral interventions for individuals with developmental disabilities and there have been numerous meta analyses conducted to synthesize these results However there have been only a few meta analyses examining the effectiveness of school based behavioral interventions for youth with developmental disabilities A gap in the literature exists in understanding the effectiveness of behavioral interventions in schools from a SWPBIS perspective for youth with developmental disabilities There also is a need to examine a wider range of dates and to examine the use of parametric statistical metrics The current study addressed these issues by conducting a meta analysis of single case design studies over approximately the past 20 years to add to the current understanding of the effect of school based behavioral interventions on behavioral outcomes of

youth with developmental disabilities Additionally moderator analyses were conducted on numerous participant intervention and study characteristics that have been deemed important in the literature The effect size of behavioral interventions on youths behavioral outcomes was determined through the use of a parametric statistical method hierarchical linear modeling The effect size was found to be large for a single case design synthesis of 3 31 and there were two moderating effects located one being the type of classroom a participant was educated in and the other the type of specific outcome studied The current study is important for decision makers in schools in terms of deciding on the specifics of behavioral interventions for youth with an intellectual disability Additionally the results of the study may be pertinent to other practitioners who work with youth in schools and their caregivers so that they can utilize school based interventions to help increase the presentation of appropriate behaviors and reduction of challenging behaviors
