Knowledge Society Anna-Katharina Hornidge, 2007 Abstract At a time of knowledge becoming increasingly relevant to social and economic development governments worldwide aim at the creation of country specific types of k society i e information societies knowledge societies or knowledge based economies This book redraws the processes of constructing k societies in Germany

and Singapore and offers an empirically based definition of k society which has been missing until now Based on the conducted research I argue that k societies are created by collective actors in society and are not as often assumed merely the result or logical consequence of the technological developments in the information and communication sector the growth of the service industry and the high profit margin of knowledge intensive goods I empirically focus on the activities of the state as collective actor who massively pursues the creation of k societies in Germany and Singapore The remaining subsystems engaged in the construction process economy Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur ,2003
