The Social Evolution of Indonesia F. Tichelman,2012-12-06 At a fairly early stage of socialism s penetration into the Afro Asian world a handful of European social democrats established an Indian Social Democratic Association ISDV They did so in a country Indonesia that was economically little developed and far away from any of the centres of European socialism and Asiatic radical national ism The ISDV was soon able to bring its influence to bear on sections of the urban proletariat and to build up an Indonesian revolutionary movement This occurred in sharp competition with a nascent nationalist leadership and then without the usual intermediary role played by radicalizing groups of native intelligentsia In this way Dutch social democrats laid the foundations for one of the first communist parties in Asia and Africa a party which was destined to become one of the few communist mass parties of the Third World However in contrast to the major communist movements of China Vietnam this Indonesian party was to demonstrate a basic weakness successive and catastrophic defeats If we leave out Japan the only non Western country where a capitalist industrial revolution occurred we see that foreign and particularly Western minorities frequently did play a dominant role in the initial and formative phases of the socialist and workers movements of the Afro Asiatic world *The Eastern Anthropologist* ,1997

explains why this dichotomy has occurred Using the coordination and context appropriate CCAP theory she assesses this divergence arguing that the success of transnational alliances hinges not only on effective coordination across borders and within workers local organizations but also on their ability to exploit vulnerabilities in global value chains invoke national and international institutions and mobilize networks of stakeholders in ways that threaten employers core material interests Brookes uses six comparative case studies spanning four industries five countries and fifteen years From dockside labor disputes in Britain and Australia to service sector campaigns in the supermarket and private security industries to campaigns aimed at luxury hotels in Southeast Asia Brookes creates her new theoretical framework and speaks to debates in international and comparative political economy on the politics of economic globalization the viability of private governance and the impact of organized labor on economic inequality From this assessment Brookes provides a vital update to the international relations literature on non state actors and transnational activism and shows how we can understand the unique capacities labor has as a transnational actor
