**Changing Geopolitics of Global Communication** Daya Thussu, 2024-07-31 Changing Geopolitics of Global Communication examines the rapidly evolving dynamics between global communication and geopolitics As an intersection between communication and international relations it bridges the existing gap in scholarship and highlights the growing importance of digital communication in legitimizing and promoting the geopolitical and economic goals of leading powers One central theme that emerges in the book is the continuity of asymmetries in power relations that can be traced back to 19th century European imperialism manifested in its various incarnations from liberal to neo liberal to digital imperialism The book includes a discussion of the post Cold War US led transformation of the hardware and software of global communication and how it has been challenged by the rise of the rest

especially China Other key issues covered include the geopolitics of image wars weaponization of information and the visibility of discourses emanating from outside the Euro Atlantic zone The ideas and arguments advanced here privilege a reading of geopolitical processes and examples from the perspective of the global South Written by a leading scholar of global communication this comprehensive and transdisciplinary study adopts a holistic approach and will be of interest to the global community of scholars researchers and commentators in communication and international relations among other fields

**Systemic Crises of Global Climate Change** Phoebe Godfrey, Denise Torres, 2016-04-14 Sociological literature tends to view the social categories of race class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity This limited focus is clearly inadequate Systemic Crises of Global Climate Change is an edited volume of 49 international interdisciplinary contributions addressing global climate change GCC by intentionally engaging with the issues of race gender and class through an intersectional lens The volume challenges and inspires readers to foster new theoretical and practical linkages and think beyond the traditional and oftentimes reductionist environmental science frame by examining issues within their turbulent political cultural and personal landscapes Varied media and writing styles invite students and educators to reflexively engage different yet complementary approaches to GCC analysis and interpretation mirroring the disparate voices and viewpoints within the field The second volume Emergent Possibilities for Sustainability will take a similar approach but will examine the possibilities for solutions as in the quest for global sustainability This book is a valuable resource for academics researchers and both undergraduate and post graduate students in the areas of Environmental Studies Climate Change Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC
