Spence, 1980-03-27 From the best known and most talented historian of China writing in English today Los Angeles Times an examination of a diverse collection of Western foreigners who attempted to change China To change China was the goal of foreign missionaries soldiers doctors teachers engineers and revolutionaries for more than three hundred years But the Chinese while eagerly accepting Western technical advice clung steadfastly to their own religious and cultural traditions As a new era of relations between China and the United States begins the tales in this volume will serve as cautionary histories for businessmen diplomats students or any other foreigners who foolishly believe that they can transform this vast enigmatic country

Russia, China and the Revisionist Assault on the Western Liberal International Order Gerlinde Groitl, 2023-05-22. This book analyzes Russian and Chinese revisionism in the face of US and Western post-Cold War liberal international order building and asks why both powers have turned revisionist in the late 2000s. The study develops a neoclassical realist model of international order building and contestation and posits to view revisionism as a strategic choice. States go revisionist if the status quo international order threatens their vital security needs broadly defined, not only as territorial security but also political, economic, normative, and ontological, and if they have the means to challenge the undesirable status quo. Russia and China were both unhappy with the post-Cold War international order of American designs but had to opt for accommodation in the 1990s and early 2000s. Strategic accommodation in the Chinese case, resentful accommodation in the Russian case, before revisionism became even more of a necessity and a real policy option from the late 2000s onward. Constructive revisionism in the Chinese case, destructive revisionism in the Russian case. The author calls for a policy of neo-containment to counter Moscow's and Beijing's efforts to game and erode the international order. [The Making of Chinese Criminal Law](#) Ying Ji, 2021-03-08. By examining the reasons behind the preventive criminalization of Chinese criminal law, this book argues that the shift of criminal law generates popular expectations of legislative participation and meets punitive demands of the public, but the expansion of criminal law lacks effective constraints which will keep restricting people's freedom in the future. The book is inspired by the eighth amendment of Chinese criminal law in 2011, which amended several penalties related to road, drug, and environmental safety. It is on the eighth amendment that subsequent amendments have been based. The amendment stemmed from a series of nationally known incidents that triggered widespread public dissatisfaction with the Chinese criminal justice system. Based on John Kingdon's theory of the multiple streams, the book explains the origins of the legislative process and its outcomes by examining the role of public opinion, policy experts, and political actors in the making of Chinese criminal law. It argues that in authoritarian China, the prominence of risk control through criminal justice methods is a state response to uncertainties generated through reforms under the CCP's leadership. The process of criminal lawmaking has become more responsive and inclusive than ever before, even though it remains a consultation with the elites within the framework set by the Chinese Communist Party (CCP), including representatives of the Lianghui, government ministries, academics, and others. The process enhances the CCP's legitimacy by not only generating popular expectations of legislative participation but also by meeting the punitive demands of the public. The book will be of interest to academics and researchers in the areas of Chinese criminal
