

5 WAYS HIGHER EDUCATION IS CHANGING IN 2025-26

As new political, legal, and economic forces reshape U.S. higher education with unprecedented momentum, it can be easy for colleges and universities to lose sight of their long-term plans. Yet in times of change, it's critical to focus on a clear vision for the future.

Institutional leaders can continue to make continuous improvements grounded in evidence and best practices by tracking the latest education developments.

Use these five trending insights to help you successfully navigate the academic year ahead.

HEIGHTENED FOCUS ON ACADEMIC PROGRAM MARKETABILITY

As student and employer expectations continue to change, institutions deliver shorter, more flexible, workforce-focused degrees and certificates that promise a higher return.

Along with an explosion of microcredentials, institutions are reformulating degree program requirements to include accelerated pathways with fewer terms or credits. Additionally, they're closely tracking program costs, contributions, and outcomes to assess effectiveness, which also positions them to meet any potential performance-based funding requirements on the horizon.

NEXT STEPS

To boost student job readiness, embed key technical skills such as AI, Excel, and SQL and soft skills such as communication, teamwork, and critical thinking across all programs.

Remaking College Mitchell Stevens, Michael W. Kirst, 2015-01-07 Between 1945 and 1990 the United States built the largest and most productive higher education system in world history Over the last two decades however dramatic budget cuts to public academic services and skyrocketing tuition have made college completion more difficult for many Nevertheless the democratic promise of education and the global competition for educated workers mean ever growing demand Remaking College considers this changing context arguing that a growing accountability revolution the push for greater efficiency and productivity and the explosion of online learning are changing the character of higher education Writing from a range of disciplines and professional backgrounds the contributors each bring a unique perspective to the fate and future of U S higher education By directing their focus to schools doing the lion s share of undergraduate instruction community colleges comprehensive public universities and for profit institutions they imagine a future unencumbered by dominant notions of traditional students linear models of achievement and college as a four year residential experience The result is a collection rich with new tools for helping people make more informed decisions about college for themselves for their children and for American society as a whole

Change Leadership in Higher Education Jeffrey L. Buller, 2014-12-02 Initiate innovation and get things done with a guide to the process of academic change Change Leadership in Higher Education is a call to action urging administrators in higher education to get proactive about change The author

applies positive and creative leadership principles to the issue of leading change in higher education providing a much needed blueprint for changing the way change happens and how the system reacts. Readers will examine four different models of change and look at change itself through ten different analytical lenses to highlight the areas where the current approach could be beneficially altered. The book accounts for the nuances in higher education culture and environment and helps administrators see that change is natural and valuable and can be addressed in creative and innovative ways. The traditional model of education has been disrupted by MOOCs, faculty unions, online instruction, helicopter parents, and much more, leaving academic leaders accustomed to managing change. Leading change, however, is unfamiliar territory. This book is a guide to being proactive about change in a way that ensures a healthy future for the institution, complete with models and tools that help lead the way. Readers will learn to lead change instead of simply managing it. Examine different models of change and redefine existing approaches. Discover a blueprint for changing the process of change. Analyze academic change through different lenses to gain a wider perspective. Leading change involves some challenges, but this useful guide is a strong conceptual and pragmatic resource for forecasting those challenges and going in prepared. Administrators and faculty no longer satisfied with the status quo can look to *Change Leadership in Higher Education* for real, actionable guidance on getting change accomplished.

Higher Education Reconsidered Jason E. Lane, 2015-10-15. Focuses on the opportunities and challenges of using the science of change to improve the academic enterprise. This is not another book about why higher education needs to change. This volume is about how to facilitate change. What could higher education achieve if varied stakeholders decided to work together to accomplish a shared vision by using data and scaling up evidence-based interventions? The contributors offer examples and instructions to help execute change in order to drive collective impact. When we understand large-scale change in other sectors such as healthcare, business, and the social sector, it can help inform us of what collective impact looks like and how to get there. A deeper investigation into the science of change will enable us to work towards increasing access, overcoming racial disparities, reducing the need for remediation, and improving learning outcomes.

Transformational Change in Higher Education Madeleine d'Ambrosio, Ronald G. Ehrenberg, 2007. This is a compelling and important text that presents both the complexity and the barriers confronting higher education in this global moment. Solutions will prize innovation, resilient leadership, unifying diverse campus subcultures, and most certainly, intellectual and academic integrity. This text begins to outline the new agenda.

Richard Guarasci, Wagner College, US. In *Transformational Change in Higher Education*, the TIAA-CREF Institute has brought together some of today's best minds to address the issues that every educational leader and policy maker should be thinking about. The topics range from financing to competition to financial aid to costs and pricing to faculty turnover to accountability to the roles presidents and boards must play. Lessons in transformation are provided by respected leaders from all segments of higher education.

George R. Boggs, American Association of Community Colleges, US. This is essential reading for everyone who cares about the future of

higher education and is a priceless reference for those who are its leaders The conversations not only cover each issue from a national perspective but also consider the specific strategies that have been employed by individual institutions to address it Thus the volume is at the same time both reflective and practical Sharon P Smith University of Pittsburgh at Greensburg US This volume delves into the financing of institutional operations with entrepreneurial leaders and is a useful addition to any university administrator s reading list if they are struggling with modern financial challenges David W Pershing University of Utah US The volume part of the TIAA CREF Institute Series on Higher Education is based on a national conference Transformational Change in Higher Education Positioning Your Institution for Future Success which was convened by the TIAA CREF Institute in November 2006 This unique volume discusses the management of transformational change in higher education as a key element of success With input from researchers presidents provosts and other senior leaders of the higher education community this edited volume explores transformational change in a range of institutions from small teaching and community colleges to large comprehensive research universities The role of entrepreneurial leaders and their interactions with trustees policymakers and the public are discussed as are strategic issues such as financing college and university operations and student access as related to pricing The editors maintain that managing change in these areas impacts both an institution s balance sheet and ultimate success in realizing its vision In this book higher education presidents chancellors provosts CFOs and governing boards will find new and actionable information to enhance decision making and inform strategic planning Association leadership will be provided with a deeper understanding of the challenges faced by their membership and possible responses Researchers and practitioners in education public policy business management and entrepreneurship interested in the business of higher education will find much of value

The Innovative University
Clayton M. Christensen, Henry J. Eyring, 2011-06-24 The Innovative University illustrates how higher education can respond to the forces of disruptive innovation and offers a nuanced and hopeful analysis of where the traditional university and its traditions have come from and how it needs to change for the future Through an examination of Harvard and BYU Idaho as well as other stories of innovation in higher education Clayton Christensen and Henry Eyring decipher how universities can find innovative less costly ways of performing their uniquely valuable functions Offers new ways forward to deal with curriculum faculty issues enrollment retention graduation rates campus facility usage and a host of other urgent issues in higher education Discusses a strategic model to ensure economic vitality at the traditional university Contains novel insights into the kind of change that is necessary to move institutions of higher education forward in innovative ways This book uncovers how the traditional university survives by breaking with tradition but thrives by building on what it s done best

Higher Education and the Pace of Change Katharine Elizabeth McBride, 1972

The Instruction Myth John Tagg, 2019-04-05 Higher education is broken and we haven't been able to fix it Even in the face of great and growing dysfunction it seems resistant to fundamental change At this point can anything be done to save it *The Instruction Myth* argues that yes higher education can be reformed and reinvigorated but it will not be an easy process In fact it will require universities to abandon their central operating principle the belief that education revolves around instruction easily measurable in course syllabi credits and enrollments Acclaimed education scholar John Tagg presents a powerful case that instruction alone is worthless and that universities should instead be centered upon student learning which is far harder to quantify and standardize Yet as he shows decades of research have indicated how to best promote student learning but few universities have systematically implemented these suggestions This book demonstrates why higher education must undergo radical change if it hopes to survive More importantly it offers specific policy suggestions for how universities can break their harmful dependence on the instruction myth In this extensively researched book Tagg offers a compelling diagnosis of what's ailing American higher education and a prescription for how it might still heal itself
