Changing Geography Of Africa And The Middle East:

The Changing Geography of Africa and the Middle East Graham Chapman,2002-03-11 CROSS REF DEV STUDIES

Both Africa and the Middle East have sought alternatives to Western models of development The last twenty five years have seen political independence for the states of Africa and increased economic dependence on external aid The Middle East resource rich and water poor continues economically robust but politically unstable In both regions widespread poverty continues as does the involvement of the West Clearly illustrated with basic maps of the countries discussed The Changing Geography of Africa and the Middle East presents a systematic review of twenty five years of development The book will prove an invaluable guide to the physical economic social and political environments of contemporary Africa and the Middle East

Africa in Contemporary Perspective Manuh, Takyiwaa,Sutherland-Addy, Esi,2014-05-08 An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s

Unfortunately hardly any readers exist which bring together a body of knowledge on the themes issues and debates which inform and animate research and teaching in African Studies particularly on the African continent This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised but driven from internal understandings of life and prospects in Africa Dominant representations and perceptions of Africa usually depict a continent in crisis Rather than buying into external representations of Africa with its lacks and aspirations for Western modernities we insist that African scholars in particular should be in the forefront of promoting understanding of the pluri lingual overlapping and dense reality of life and developments on the continent to produce relevant and usable knowledge Continuing and renewed interest in Africa s resources including the land mass economy minerals visual arts and performance cultures as well as bio medical knowledge and products by old and new geopolitical players obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the interests of Africa s people

Food Culture in Sub-Saharan Africa Fran Osseo-Asare,2005-06-30 East African notably Ethiopian cuisine is perhaps the most well known in the States This volume illuminates West southern and Central African cuisine as well to give students and other readers a solid understanding of how the diverse African peoples grow cook and eat food and how they celebrate special occasions and ceremonies with special foods Readers will also learn about African history religions and ways of life plus how African and American foodways are related For example cooking techniques such as deep frying and ingredients such as peanuts chili peppers okra watermelon and even cola were introduced to the United States by sub Sahara Africans who were brought as slaves Africa is often presented as a monolith but this volume treats each region in turn with representative groups and foodways presented in manageable fashion with a truer picture able to emerge It is noted that the boundaries of many countries are imposed so that food culture is more fluid in a region Commonalities are also presented in the basic format of a meal with a starch with a sauce or stew and vegetables and perhaps some protein
