connect post war research on Borneo to wider scholarship It also assesses some of the more recent contributions and interests of locally based researchers in universities and other institutions in Borneo itself The major strength of the book is the inclusion of a substantial amount of research undertaken by scholars working and teaching within the Southeast Asian region In particular there is an examination of research materials published in the vernacular notably the outpouring of work published in Indonesian by the Institut Dayakologi in Pontianak In doing so the book also addresses the urgent matters which have not received the attention they deserve specifically subjects themes and issues that have already been covered but require further contemplation elaboration and research and the scope for disciplinary and multidisciplinary collaboration in Borneo Studies The book is a valuable resource and reference work for students and researchers interested in social science scholarship on Borneo and for those with wider interests in Indonesia and Malaysia and in the Southeast Asian region
