Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 Architectural Drawings as Investigating Devices explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries It traces their transformations paying special attention to Le Corbusier and Ludwig Mies van der Rohe s preference for perspective representation to the diagrams of Team 10 architects to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi John Hejduk Peter Eisenman and Oswald Mathias Ungers and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture OMA Particular emphasis is placed on the spirit of truth and clarity in modernist architecture the relationship between the individual and the community in post war era architecture the decodification of design process as syntactic analogy and the paradigm of autonomy in the 1970s and 1980s architecture the concern about the dynamic character of urban conditions and the potentialities hidden in architectural programme in the post autonomy era This book is based on extensive archival research in Canada the USA and Europe and will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

The Politics of Making Mark Swenarton, Igea Troiani, Helena Webster, 2013-04-15 A unique collection of contemporary writings this book explores the politics involved in the making and experiencing of architecture and cities from a cross cultural and global perspective Taking a broad view of the word politics the essays address a range of questions including What is the relationship between politics and the making of space What role has theory played in reinforcing or resisting political power What are the political difficulties associated with working relationships Do the products of our making construct our identity or liberate us A timely volume focusing on an interdisciplinary debate on the politics of making this is valuable reading for all students professionals and academics interested or working in architectural theory

Weather Architecture Jonathan Hill, 2013-06-17 Weather Architecture further extends Jonathan Hill s investigation of authorship by recognising the creativity of the weather At a time when environmental awareness is of growing relevance the overriding aim is to understand a history of architecture as a history of weather and thus to consider the weather as an architectural author that affects design construction and use in a creative dialogue with other authors such as the architect and user Environmental discussions in architecture tend to focus on the practical or the poetic but here they are considered together Rather than investigate architecture s relations to the weather

in isolation they are integrated into a wider discussion of cultural and social influences on architecture The analysis of weather s effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of changing attitudes to the weather in the arts sciences and society leading to a critical re evaluation of contemporary responses to climate change

Scale Gerald Adler, Timothy Brittain-Catlin, Gordana Fontana-Giusti, 2013-01-11 Scale is a word which underlies much of architectural and urban design practice its history and theory and its technology Its connotations have traditionally been linked with the humanities in the sense of relating to human societies and to human form To build in scale is an aspiration that is usually taken for granted by most of those involved in architectural production as well as by members of the public yet in a world where value systems of all kinds are being questioned the term has come under renewed scrutiny The older more particular meanings in the humanities pertaining to classical Western culture are where the sense of scale often resides in cultural production Scale may be traced back ultimately to the discovery of musical harmonies and in the arithmetic proportional relationship of the building to its parts One might question the continued relevance of this understanding of scale in the global world of today What in other words is culturally specific about scale And what does scale mean in a world where an intuitive visual understanding is often undermined or superseded by other senses or by hyper reality Structured thematically in three parts this book addresses various issues of scale The book includes an introduction which sets the scene in terms of current architectural discourse and also contains a visual essay in each section It is of interest to undergraduate and postgraduate students academics and practitioners in architecture and architectural theory as well as to students in a range of other disciplines including art history and theory geography anthropology and landscape architecture

Fonthill Recovered Caroline Dakers, 2018-05-16 Fonthill in Wiltshire is traditionally associated with the writer and collector William Beckford who built his Gothic fantasy house called Fonthill Abbey at the end of the eighteenth century The collapse of the Abbey s tower in 1825 transformed the name Fonthill into a symbol for overarching ambition and folly a sublime ruin Fonthill is however much more than the story of one man s excesses Beckford s Abbey is only one of several important houses to be built on the estate since the early sixteenth century all of them eventually consumed by fire or deliberately demolished and all of them oddly forgotten by historians Little now remains a tower a stable block a kitchen range some dressed stone an indentation in a field Fonthill Recovered draws on histories of art and architecture politics and economics to explore the rich cultural history of this famous Wiltshire estate The first half of the book traces the occupation of Fonthill from the Bronze Age to the twenty first century Some of the owners surpassed Beckford in terms of their wealth their collections their political power and even in one case their sexual misdemeanours They include Charles I s Chancellor of the Exchequer and the richest commoner in the nineteenth century The second half of the book consists of essays on specific topics filling out such crucial areas as the complex history of the designed landscape the sources of the Beckfords wealth and their collections and one essay that features the most recent appearance of the
