## **Changing The Guard Private Prisons And The Control Of Crime:**

*Changing the Guard* Alexander Tabarrok, 2002-10-01 Changing the Guard is an authoritative survey of one of the most controversial aspects of criminal justice and corrections the growing use of private prisons When prison privatization began in the United States in the early 1980s many policy analysts claimed it would increase costs decrease quality and erode state authority Has it Changing the Guard brings together leading criminal justice researchers to tackle this and related questions Does prison privatization make economic sense What are the prospects for enlarging prison privatization Changing the Guard also examines the broader questions that surround the prison privatization debate What are the historical precedents for prison privatization What do we know about punishment and recidivism How long must a prison sentence be to deter crime Are too many people in prison or too few Should legal reform take precedence over prison reform to ensure that privatization does not simply make the criminal justice system more efficient at abusing civil liberties and executing legal injustices

*Inside Private Prisons* Lauren-Brooke Eisen, 2017-11-07 When the tough on crime politics of the 1980s overcrowded state prisons private companies saw potential profit in building and operating correctional facilities Today more than a hundred thousand of the 1.5 million incarcerated Americans are held in private prisons in twenty nine states and federal corrections Private prisons are criticized for making money off mass incarceration to the tune of 5 billion in annual revenue Based on Lauren Brooke Eisen's work as a prosecutor journalist and attorney at policy think tanks *Inside Private Prisons* blends investigative reportage and quantitative and historical research to analyze privatized corrections in America From divestment campaigns to boardrooms to private immigration detention centers across the Southwest Eisen examines private prisons through the eyes of inmates their families correctional staff policymakers activists Immigration and Customs Enforcement employees undocumented immigrants and the executives of America's largest private prison corporations Private prisons have become ground zero in the anti mass incarceration movement Universities have divested from these companies political candidates hesitate to accept their campaign donations and the Department of Justice tried to phase out its contracts with them On the other side impoverished rural towns often try to lure the for profit prison industry to build facilities and create new jobs Neither an endorsement or a demonization *Inside Private Prisons* details the complicated and perverse incentives rooted in the industry from mandatory bed occupancy to vested interests in mass incarceration If private prisons are here to stay how can we fix them This book is a blueprint for policymakers to reform practices and for concerned citizens to understand our changing carceral landscape

*Corrections and the Criminal Justice System* David C. May, Kevin I. Minor, Betsy A. Matthews, 2008 *Corrections And The Criminal Justice System Is Designed To Help Students Understand Corrections In Relation To The Entire Criminal Justice System This Text Begins With An Overview Of The Field Of Criminal Justice And Covers The Components Of The Criminal Justice System That An Offender Must Pass Through Prior To His Her Corrections Experience Police Courts And Sentencing The Second Part Of The Text Shows Students How Corrections Is*

Interconnected And Related To The Other Aspects Of The Criminal Justice System **American Criminal Justice Policy**

Daniel P. Mears, 2010-04-12 American Criminal Justice Policy examines many of the most prominent criminal justice policies on the American landscape and finds that they fall well short of achieving the accountability and effectiveness that policymakers have advocated and that the public expects. The policies include mass incarceration, sex offender laws, supermax prisons, faith-based prisoner reentry programs, transfer of juveniles to adult court, domestic violence mandatory arrest laws, drug courts, gun laws, community policing, private prisons, and others. Optimistically, Daniel P. Mears argues that this situation can be changed through systematic incorporation of evaluation research into policy development, monitoring, and assessment. To this end, the book provides a clear and accessible discussion of five types of evaluation: needs theory, implementation or process, outcome, and impact, and cost efficiency. It identifies how these can be used both to hold the criminal justice system accountable and to increase the effectiveness of crime control and crime prevention efforts. Changing the Guard

Alexander Tabarrok, 2003 When prison privatization began in the United States in the early 1980s, many policy analysts claimed that the result would be higher costs, declining quality, and an erosion of state authority. The five contributors to this volume discuss the actual impacts of privatization and examine the economic as well as the social implications of prison reform. Economist Ken Avio begins with an analysis of the broader issues surrounding the private prison debate, such as punishment and recidivism and crime deterrence. Charles Thomas provides the empirical context for understanding the debate and discusses the historical origins, present status, and future prospects. Samuel Jan Brakel and Kimberly Ingersoll Gaylord examine the costs and quality of private prisons, and Bruce Benson argues that prison privatization be instituted in concert with certain aspects of the criminal justice system. **Corrections** William J. Chambliss, 2011-05-03 Corrections looks at the correctional system and offers arguments for and against the practice of the laws and policies that comprise corrections, from parole and probation to imprisonment to the application of the death penalty. The 20 included chapters, written by eminent scholars and experts in the fields of criminology, police science, law, sociology, psychology, and other disciplines, take on such contested topics as what the goals of the correctional system should be: deterrence, rehabilitation, retribution, or something else, and how they should be achieved; who should make these decisions; and how to balance the goals of the correctional system with the civil rights of the inmates. Prison conditions and the treatment of prisoners, as well as the changing definition of cruel and unusual punishment, are also examined. The Series The five brief issues-based books in SAGE Reference's Key Issues in Crime Punishment Series offer examinations of controversial programs, practices, problems, or issues from varied perspectives. Volumes correspond to the five central subfields in the Criminal Justice curriculum: Crime, Criminal Behavior, Policing, The Courts, Corrections, and Juvenile Justice. Each volume consists of approximately 20 chapters offering succinct pro/con examinations and Recommended Readings conclude each chapter, highlighting different approaches to or perspectives on the issue at hand. As a set, these volumes provide perfect reference support for students writing position

papers in undergraduate courses spanning the Criminal Justice curriculum Each title is approximately 350 pages in length

Close, 2006-02 Is Classical Liberalism Still Vital The quest for freedom has always been as much a battle of ideas as it is a popular struggle Classical liberal pioneers such as John Locke and Adam Smith stressed the inherent worth of the individual inalienable rights and the benevolent consequences of the cooperative peaceful pursuit of one s own happiness These ideas became the intellectual scaffolding for much of the West s most fundamental institutions and achievements Yet after its 19th century high water mark classical liberalism lost much of its passion focus and popular support Intellectual trends increasingly began to support coercive egalitarianism empire and central planning at the expense of individual liberty personal responsibility private property natural law and free institutions But the eclipse of classical liberalism by contemporary liberalism and conservatism is passing The Challenge of Liberty restores the ideas and ideals of classical liberalism and shows how its contemporary exponents defend such pillars of free societies as individual rights human dignity market processes and the rule of law The Che Guevara Myth and the Future of Liberty Alvaro Vargas Llosa, 2006 Nearly four decades after his death the legend of Che Guevara has grown worldwide In this new book Alvaro Vargas Llosa separates the myth from the

reality of Che's legacy and shows that Che's ideals were a rehash of notions about centralized power that have long been the major source of suffering and misery in the underdeveloped world. With testimonies from witnesses of Che's actions, Alberto Vargas Llosa's detailed account of the real Che sets the record straight by exposing the delusion at the heart of the Che phenomenon. Vargas Llosa shows that Che's legacy—making the law subservient to the most powerful, crushing any and all dissent, and concentrating wealth under the guise of social equality—is not the solution to poverty and injustice but is the core of the problem. Besides exposing the dark truths of Che's ideology and actions, *The Che Guevara Myth and the Future of Liberty* elaborates on attempts by both the left and right to suppress liberty and examines the manifestation of Latin American spirit throughout the ages, from early indigenous trade to today's enterprising communities overcoming government impediments. In so doing, the book points to the real revolution among the poor: the liberation of individuals from the constraints of state power in all spheres, public and private. Whether you love or hate Che, *The Che Guevara Myth and the Future of Liberty* will not leave you untouched and will provide a powerful new perspective on how to overcome the challenges facing the Third World.

**Prohibitions** John Meadowcroft, 2008. This collection of essays examines those areas where the freedom of individual men and women to voluntarily engage in mutually advantageous exchanges is prohibited or restricted by government. The authors critically examine the economic and philosophical rationale for the prohibition of alcohol, the sale of body parts, medicinal drugs, pornography, prostitution, recreational drugs, tobacco, and trade in endangered species, among other topics.

**Lessons from the Poor** Alvaro Vargas Llosa, 2008-05. An important contribution to the literature of economic development, this book presents case studies of productive entrepreneurship in contemporary Africa and Latin America. It looks at the growth of Kenya's chain stores and one-person kiosks, the rise of barter clubs in Argentina, and Nigeria's clothing design industry to illustrate economists' insights about entrepreneurship and the role that government regulations often play in impeding economic development. Half the people in the world live on two dollars or less per day, and roughly 600 million live on no more than one dollar per day. With thousands of international relief organizations, strategic government programs, and billions of dollars in foreign aid, why do so many underdeveloped countries remain unable to grow their economies beyond mere survival? It is this issue that internationally acclaimed political analyst Alvaro Vargas Llosa and a select group of economists examine in a series of case studies from around the world. These studies reveal that entrepreneurial energy can be a persistent catalyst for change. But unfortunately, in societies dominated by political corruption and unnecessary regulation, men and women seeking to innovate must hurdle a series of challenges. Wealth transfer, favoritism, excessive taxation, and lack of institutional security all conspire against progress. Our contributors examine real-world examples of entrepreneurship and argue that, instead of redistributing existing wealth, developing countries should start working to create it.
