Chaos Cosmos And Saintexuperys Pilot A Study In Mythopoeia:

Chaos, Cosmos and Creation in Early Greek Theogonies Olaf Almquist, 2022-01-13 Cosmological narratives like the creation story in the book of Genesis or the modern Big Bang are popularly understood to be descriptions of how the universe was created. However, cosmologies also say a great deal more. Indeed, the majority of cosmologies, ancient and modern, explore not simply how the world was made but how humans relate to their surrounding environment and the often thin line which separates humans from gods and animals. Combining approaches from classical studies, anthropology, and philosophy, this book studies three competing cosmologies of the early Greek world: Hesiod's *Theogony*, the Orphic *Derveni Theogony*, and Protagoras' creation myth in Plato's eponymous dialogue. Although all three cosmologies are part of a single mythic tradition and feature a number of similar events and characters, Olaf Almquist argues they offer very different answers to an ongoing debate on what it is to be human. Engaging closely with the ontological turn in anthropology and in particular with the work of Philippe Descola, this book outlines three key sets of ontological assumptions: analogism, pantheism, and naturalism, found in early Greek literature and explores how these competing ontological assumptions result in contrasting attitudes to rituals such as prayer and sacrifice.

Myth, Chaos, and Certainty Rosolino Buccheri, 2020-12-29 This book offers a study of the three evolutions in a circle: cosmos, life, and knowledge, with the aim of discussing human social behavior as a metaphor of the general behavior of nature from which man derives. Within the fluctuating equilibrium between the opposite tendencies to cohesion and shredding, a circularity reveals an indefinite and probably never-conclusive run-up of human beings to the knowledge of nature, an analysis that demonstrates any theoretical/practical impossibility to formulate absolute certainties since it depicts a situation in which man finds himself hovering between a rational way of living and the contradictory *modus operandi* of mythos. All that within a society where the powerful communication and transportation technologies give rise to conflicts and fragmentations, where anyone's will to self-distinguishing is enhanced by highlighting any small difference and obscuring any large similarity. The main difference between this book and existing ones stems from its interdisciplinary nature, particularly because it establishes a close connection between three apparently so different disciplines: cosmology, life sciences, and sociology, compared with respect to their increasing complexity, laws giving rise to always more chaotic configurations.
