The Challenge to the Liberal Order: Norms of the Global South

Jacqueline Braveboy-Wagner

Introduction

This is a time of rising interest in the Global South in Western academia, matching increased interest in policy circles. In support of this contention, Haug (2021, 1924) cites Elsevier's Scopus database, where references to the "Global South" in titles, abstracts, and keywords in Anglophone publications have expanded from one registered publication mentioning the term in 1994, to thirty in 2005, and more than 1,600 in 2020. In policy circles, China, still considering itself a champion of the South (Char 2016), has gone from being considered

an emerging power with a very long way to go in the 1980s and 1990s to being an economic powerhouse with regional military ambitions and global reach.

Scholars and commentators have for some time now been remarking on and writing about the perceived threat of China's rise (for example, Luttwak 2012; Layne 2018). Meanwhile, in U.S. policy circles, both former President Donald Trump and current President Joe Biden (using slightly differing strategies)¹ have prioritized China in their strategic planning, vowing to keep it from continuing, as they see it, to threaten the liberal order. In the Interim National Security Strategy

¹ In National Security documents, both presidents have adopted similar views: that China is a threat to U.S. values and interests and should be contained both by building up domestic capabilities as well as countering China's initiatives globally; that the U.S. can engage with China on some global issues, and that close cooperation with allies is advisable. In practice, however, President Trump was less cooperative with allies (seeing them as functioning to magnify U.S. power [NSS 2017, 46]), whereas President Biden has been more willing to see them as global partners in initiatives to contain China as well as on global issues in general. Biden has also articulated more clearly that indeed, there are issues on which cooperation with China is needed (case in point, his signature climate change focus).
