Challenge of Asian Developing Countries Shin'ichi Ichimura, 1988 **The Dynamics of Asian Economic Development** Hitoshi Hirakawa, Ferdinand C. Maquito, 2024-12-10

One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework. The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century. General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia. This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies. Moreover, the book concretely deals with the US-China trade war and China's Belt and Road Initiative (BRI) as a problem of Asian economies. In so doing, the book not only perceives the structural change of the global economy as a structural change from a US-centric global economy of the twentieth century to a China-centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China. The investment initiative through China's BRI has prompted the investment competition between Japan and the US, which has made even stronger the possibility of giving birth to a new economic frontier in Afro-Eurasia. Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study. The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region. At the same time, this book studies the significance and new issues as a region of the economy and overseas policies of attention drawn by China.

Analyzing Global Responses to Contemporary Regional Conflicts Pietrzak, Piotr, 2024-03-18

In a world characterized by persistent local and regional conflicts, policymakers and professionals in current affairs and security studies are increasingly challenged. From the ongoing war in Yemen to the complex civil war in Syria and the recent Nagorno-Karabakh Conflict, the global landscape is shaped by violent disruptions that demand a nuanced understanding. Geopolitical tensions, humanitarian crises, and the intricate interplay of international actors necessitate a comprehensive guide for those seeking to navigate this complex web of challenges. *Analyzing Global Responses to Contemporary Regional Conflicts* emerges as a beacon of insight and a tangible solution to this urgent problem. This edition is a crucial tool for academic scholars and professionals, providing readers with the knowledge necessary to comprehend the complexities of global conflicts. By drawing on geoeconomics, geopolitics, security studies, and humanitarian perspectives, the book explores the roots of competition and cooperation among states but also critically examines conflict prevention, peacebuilding, and the role of key international entities. It goes beyond mere analysis, offering a roadmap for a more peaceful and stable future.

Development Asia—Deepening Divide: Can Asia Beat the Menace of Rising Inequality? Asian Development Bank,2013-04-01 Development Asia examines Asia s widening inequality from many different perspectives It looks at the role of globalization in producing inequality and considers the disputed relationship between inequality and economic growth Beneath the gloss of Asia s newfound prosperity lies an unsettling reality Rising inequality has denied the benefits of Asia s economic growth to many millions of its citizens The problem is worsening as the region s rich get richer much faster than the poor who miss out on the income education and health care they need to lead fulfilling lives Asia isn t the only region suffering from a wealth gap but unlike others it has failed so far to narrow the divide Most of its large economies have shown rising income inequality since the 1990s and rural poverty is outpacing urban poverty across much of the continent If left unchecked the consequences of this trend could be dire In this issue Development Asia examines Asia s widening inequality from many different perspectives It looks at the role of globalization in producing inequality and considers the disputed relationship between inequality and economic growth
