Chance Vought Corsair:

Chance Vought F4u Corsair Maciej Noszczak,2019-04-19 The enormous war demand for all kinds of armaments including fighters caused the Vought factory to be overloaded with production Therefore it was extended to Brewster and Goodyear factories where the production of F4U fighters began Ultimately 12 500 Corsairs were built in 16 different variants The first production version of the Corsair F4U 1 had a characteristic built in fairing cabin so called birdcage which also forced to lower the position of the pilot s seat There were many visible changes compared to the XF4U 1 prototype First of all the cockpit was moved 81 cm to the rear due to the installation of a much larger fuel tank in front of the cabin The whole fuselage was then extended by 43 cm Cockpit armor and a bulletproof windshield were also used To improve visibility from the cabin a windows behind the pilot s headboard were added on both sides The F4U 1 version was powered by the Pratt Whitney R 2800 8 twin wasp engine Another variant was the F4U 1A in which more or less from mid to the end of the production a higher and wider canopies were used very similar to the British Malcolm hood The pilot s seat was raised by 18 cm which in addition with a new canopy and lengthening the tailwheel leg by 15 cm improved the visibility from the cockpit over the enormous nose of the machine An important improvement was the introduction of much better oil shock absorbers on the main undercarriage which eliminated the problem of kangaroos during landings This had a considerable impact on Corsair service on board of aircraft carriers

Chance Vought F4u Corsair Maciej Noszczak,2018-04 In February 1938 the United States Navy opened a competition for a new fighter His maximum speed and operational ceiling were to exceed all the machines that the American aviation had at the time Among others the Chance Vought company entered the competition The Corsair was designed by a team of engineers led by Rex Beisel the company s chief constructor The prototype XF4U 1 was flown on May 29 1940 The Corsair was powered by an eighteen cylinder Pratt Whitney R 2800 Double Wasp That was the largest and the most powerful radial engine ever installed in a single seat front fighter
