CHANGER OF DAYS

A woman with long, wavy brown hair, wearing a white, long-sleeved, high-collared dress with intricate silver embroidery, stands in a grand, classical-style building. She is positioned in the center, between two large stone columns. The building features arched doorways and hanging lanterns. The background shows a sunset or sunrise over a landscape with mountains and a body of water. The overall atmosphere is ethereal and majestic.

Time in Ecology Eric Post,2019-02-26 Ecologists traditionally regard time as part of the background against which ecological interactions play out In this book Eric Post argues that time should be treated as a resource used by organisms for growth maintenance and offspring production Post uses insights from phenology the study of the timing of life cycle events to present a theoretical framework of time in ecology that casts long standing observations in the field in an entirely new light Combining conceptual models with field data he demonstrates how phenological advances delays and stasis documented in an array of taxa can all be viewed as adaptive components of an organism s strategic use of time Post shows how the allocation of time by individual organisms to critical life history stages is not only a response to environmental cues but also an important driver of interactions at the population species and community levels To demonstrate the applications of this exciting new conceptual framework Time in Ecology uses meta analyses of previous studies as well as Post s original data on the phenological dynamics of plants caribou and muskoxen in Greenland **Nautical Almanac and Astronomical Ephemeris** ,1875 **The Journal of Experimental Zoology** ,1924 A separate section of the journal Molecular and developmental evolution is devoted to experimental approaches to evolution and development The Færoe islands pilot Admiralty hydrogr. dept,Great Britain.
