Changing Face Of Thailand:

The Changing Face of Management in Thailand Tim Andrews, Sununta Siengthai, 2009-05-19 In the decade following the Asian financial crisis of 1997-1998 the management of organizations in Thailand has undergone significant change and development. *The Changing Face of Management in Thailand* examines in depth the development of management during this pivotal period in the country's recent history. The book draws together an impressive assortment of scholars, consultants, and practitioners whose experience and expertise significantly enhance our knowledge and understanding of this complex, multi-faceted Asian economy. The book is divided into 3 main sections: an examination of the political, economic, social, and technological changes from 1997-2008; specialist chapters that contextualise these developments from the marketing, HR, and finance perspectives; concluding sections focusing on public sector organizations, women managers, corporate governance, e-communication, and the Thailand Brand. With a wealth of vignettes, anecdotes, and illustrative quotations, bringing each chapter to life, this volume offers a refreshing, updated, and in-depth analysis of this rich, diverse, and fascinating nation.

The Changing Face of Management in South East Asia Chris Rowley, Saaidah Abdul-Rahman, 2007-12-19 Providing an independent exploration of management practices in selected South East Asian countries, this title includes case studies of management styles in leading firms and individual outstanding manager case studies.

The Changing Face of Women Managers in Asia Chris Rowley, Vimolwan Yukongdi, 2008-09-10 This book examines the influence of culture and tradition on organizational and management practices and how these affect the progress of women in management in Asian economies. It explores which organizational and management practices are universal and which are culture-specific and how these in turn affect the advancement and representation of women in the Asian region.

The Changing Face of Retailing in the Asia Pacific Elizabeth Howard, 2013-10-18 Retailing in the countries of Asia Pacific is changing dramatically. Changes which took decades, even centuries elsewhere, are happening in a few years. The growth of larger firms and the arrival of international retailers are changing the business landscape, bringing the consistent supply and presentation of wider ranges of goods to consumers and leading to the development of new kinds of retail stores and modern shopping malls, often in new locations. All of these developments are important for economic growth and for consumers and their lifestyles. They raise questions for governments about foreign investment, about social and environmental change, and about the fate of traditional retailers. This book examines the trends, seeking to understand how far they are global and how local circumstances affect developments. International retailers have spread across the region but not always successfully. Studies in several countries look at their processes of growth and some of the reasons for success and failure. A review of changing regulation across the region suggests regulators should be concerned to avoid the problems of overconcentration of retail power, and country studies reflect on the effects of regulation as well as cultural and other influences on change. This book was published as a special issue of *Asia Pacific Business Review*.
