Change at Work Peter Cappelli, Laurie Bassi, Harry Katz, David Knoke, Paul Osterman, Michael Useem, 1997-02-27 A far reaching transformation is taking place in the US in the relationship between employers and employees The lessons learned from Japan and from best practice companies like IBM about how job security training and internal development can improve employee commitment and performance have given way to a new set of lessons about how companies can reduce fixed costs increase flexibility and improve performance by eliminating the elaborate employment systems that prepared employees for long careers in the company Where the old arrangement protected employees from outside market forces the new ones drag the market right back in through downsizing contingent workforces hiring on the outside for new skills and compensation contingent on overall organizational performance New work systems that reengineer processes and empower employees flatten the organizational chart cutting management jobs in particular and reducing opportunities for career development The new arrangements shift many of the risks of business from the firm to the employees and make employees rather than employers responsible for developing their own skills and careers They also increase the demands placed on workers while reducing what they receive back for their efforts While morale is down and stress is up employee performance seems to be rising largely because of fear driven by the shortage of good jobs Change at Work explores the theme that employees have paid the price for the widespread restructuring of American firms as illustrated by reduced security greater effort and hours and reduced morale In this important study commissioned by the National Planning Association's Committee on New American Realities the authors consider how individuals and employers need to adapt to the new arrangements as well as the implications for important policy issues such as how skills will be developed where the attachment to the firms is sharply reduced The future is uncertain but the authors argue that the traditional relationship between employer and employee will continue to erode making this work essential reading for managers concerned with the profound impact corporate restructuring has had on the lives of workers

Changing Urban Education Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future
