Changing South:

Changing Values, Persisting Cultures Thorleif Pettersson, Yilmaz R. Esmer, 2008 In 1981 the European and World Values surveys started the empirical investigation of cultural values on a global scale This volume builds upon the findings of these surveys and analyzes value change in a number of key countries around the globe The authors track value change and stability in their respective countries during the last decade the last two decades where data are available of the 20th century All authors have been actively involved in value surveys and have a great deal of expertise in countries that they write on Thus the volume is a valuable complement to studies that deal with the topic from a global perspective without providing any detail about individual societies The countries covered are Argentina Austria Canada Denmark France Germany Mexico the Netherlands South Africa South Korea Spain Sweden Turkey and the United States *Resources in Education*, 1982

Traders and Trade in Colonial Ovamboland, 1925-1990 Gregor Dobler, 2014-08-14 Taking the history of trade and of traders as its subject matter this book offers the first economic history of northern Namibia during the twentieth century It traces Namibia's way from a rural largely self-relying society into a globalised economy of consumption This transformation built on colonial economic activities but it was crucially shaped by local traders a new social elite emerging during the 1950s and 1960s Becoming a trader was one of the few possibilities for black Namibians to gain monetary income at home It was a pathway out of migrant labour to new status in the local society and often to prosperity Politically most traders occupied a middle ground content of their own social position but intent on political emancipation from colonial rule Economically their energy and business acumen transformed northern Namibia into an increasingly urban consumer society The development path they chose however depended too much on the colonial reserve economy to remain sustainable after 1990 Their legacy still shapes spatial and social structures in northern Namibia but most traders' businesses have today closed down By telling the history of the rise and decline of traders and trade in northern Namibia this book is thus also a reflection on the conundrums of economic development under conditions of structural inequality *Routledge Handbook of Urban Planning in Africa* Carlos Nunes Silva, 2019-10-28 This handbook contributes with new evidence and new insights to the on-going debate on the decolonization of knowledge on urban planning in Africa African cities grew rapidly since the mid-20th century in part due to rising rural migration and rapid internal demographic growth that followed the independence in most African countries This rapid urbanization is commonly seen as a primary cause of the current urban management challenges with which African cities are confronted This importance given to rapid urbanization prevented the due consideration of other dimensions of the current urban problems challenges and changes in African cities The contributions to this handbook explore these other dimensions looking in particular to the nature and capacity of local self-government and to the role of urban governance and urban planning in the poor urban conditions found in most African cities It deals with current and contemporary urban challenges and urban policy responses but also offers an historical overview of

local governance and urban policies during the colonial period in the late 19th and 20th centuries offering ample evidence of common features and divergent features as well on a number of facets from intra urban racial segregation solutions to the relationships between the colonial power and the natives to the assimilation policy as practiced by the French and Portuguese and the Indirect Rule put in place by Britain in some or in part of its colonies Using innovative approaches to the challenges confronting the governance of African cities this handbook is an essential read for students and scholars of Urban Africa urban planning in Africa and African Development

The Changing Political South Charles S. Bullock, III, Susan A. MacManus, Jeremy D. Mayer, Mark J. Rozell, 2024 The phenomenal growth of minority populations in the South particularly Latinos and Asians is quickly transforming the region s politics Some argue that demography is destiny and yet the analyses presented in *The Changing Political South* demonstrate little such certainty about the future competitiveness of the two major parties in the South This volume substantiates the strong and persistent Democratic leanings of Black voters and a majority of women yet it finds that the rising minority populations votes are increasingly up for grabs by the two major parties How the two parties fare in the future of Southern politics will be driven largely by their abilities to reach these new voters

Opportunity Charles Spurgeon Johnson,1969 *The Changing American Countryside* Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
