Changing Valency Case Studies In Transitivity:

Changing Valency Robert M. W. Dixon, Aleksandra IľUľr'evna Aïkhenval'd, 2000-02-10 This book provides a general perspective on valency changing mechanisms passives antipassives causatives applicatives in the languages of the world It contains a comprehensive typology of causatives by R M W Dixon and detailed descriptions of valency changing mechanisms in ten individual languages by leading scholars based on original fieldwork The sample languages span five continents and every kind of structural profile Each contributor draws out the theoretical status and implications of valency changing derivations in their language of study and the relevant parameters are drawn together and typological possibilities delineated in the editors introduction The volume originally published in 2000 will interest typologists those working in the fields of morphosyntactic variation and lexical semantics and exponents of formal theories engaging with the range of linguistic diversity found in natural language

Case, Valency and Transitivity L. I. Kulikov, Andre? L?vovich Mal?chukov, Dr Peter Swart, 2006-01-01 The three concepts of case valency and transitivity belong to the most discussed topics of modern linguistics On the one hand they are crucially connected with morphological aspects of the clause including case marking person agreement and voice On the other hand they are related to several semantic issues such as the meaning of case semantico syntactic verbal classes and the semantic correlates of transitivity The volume unifies papers written within different theoretical frameworks and representing variegated approaches Optimality Theory Government and Binding various versions of the Functional approach Cross linguistic and Typological analyses containing both numerous new findings in individual languages and valuable observations and generalizations related to case valency and transitivity

Introducing the Framework, and Case Studies from Africa and Eurasia Andrej Malchukov, Bernard Comrie, 2015-09-14 Earlier empirical studies on valency have looked at the phenomenon either in individual languages or a small range of languages or have concerned themselves with only small subparts of valency e g transitivity ditransitive constructions leaving a lacuna that the present volume aims to fill by considering a wide range of valency phenomena across 30 languages from different parts of the world The individual language studies each written by a specialist or group of specialists on that language and covering both valency patterns and valency alternations are based on a questionnaire reproduced in the volume and an on line freely accessible database thus guaranteeing comparability of cross linguistic results In addition introductory chapters provide the background to the project and discuss its main characteristics and selected results while a series of featured articles by leading scholars who helped shape the field provide an outside perspective on the volume s approach The volume is essential reading for anyone interested in valency and argument structure irrespective of theoretical persuasion and will serve as a model for future descriptive studies of valency in individual languages

Cross-linguistic Semantics of Tense, Aspect, and Modality Lotte Hogeweg, Helen de Hoop, Andrej Malchukov, 2009-11-30 In recent years we have witnessed on the one hand an increased interest in cross linguistic data in formal semantic studies and on the other hand an increased concern for

semantic issues in language typology However only few studies combine semantic and typological research for a particular semantic domain such as the papers in Bach et al 1995 on quantification and Smith 1997 on aspect This book brings together formal semanticists with a cross linguistic perspective and or those working on lesser known languages and typologists interested in semantic theory to discuss semantic variation in the specific domain of Tense Aspect and Mood Modality **A Functional Account of Marathi's Voice Phenomena** Prashant Pardeshi,2016-02-02 A Functional Account of Marathi's Voice Phenomena offers a comprehensive account of the formal and semantic aspects of the two most prominent voice phenomena in Marathi the passive and the causative Previous studies offer many partial insights into various aspects of Marathi's passives and causatives However a comprehensive description of the formal semantic and pragmatic aspects of Marathi's passives and causatives as not been available so far Attempting to fill this gap the present monograph offers a description in the functional typological framework At the same time it introduces the reader to the rich tradition of grammatical studies in Marathi which up to now have remained inaccessible to those who are unfamiliar with the language

Turkish and Warlpiri This is an important addition to the growing body of literature on language universals and variation from formal theoretical perspectives It will be a useful reference to linguistics specialists and other cognitive scientists The topics covered are also diverse ranging from pronominal clitic variation in dialects of Spanish to passives in Bantu and Polish and the typology of Wh in situ questions and vowel place constraints

Applicative Morphology Sara Pacchiarotti, Fernando Zuniga, 2022-10-03 This book is about recurrent functions of applicative morphology not included in typologically oriented definitions Based on substantial cross linguistic evidence it challenges received wisdom on applicatives in several ways First in many of the surveyed languages applicatives are the sole means to introduce a non Actor semantic role into a clause When there is an alternative way of expression the applicative counterpart often has no valence increasing effect on the targeted root Second applicative morphology can introduce constituents which are not syntactic objects and or co occur with obliques Third functions such as conveying aspectual nuances to the predicate intensity repetition habituality or its arguments partitive P highly individuated P narrow focusing constituents and functioning as category changing devices are attested in geographically distant and genetically unrelated languages Further this volume reveals that spatial related morphology is prone to developing applicative functions in disparate languages and phyla Finally several contributions discuss the diachrony of applicative constructions and their non syntactic attested functions including a case of applicatives in the making

Voice and Argument Structure in Baltic Axel Holvoet, Nicole Nau, 2015-08-15 The second volume in the VARGReB series deals with voice in the wider sense encompassing both alternations that preserve semantic valency with passives as the most typical instance and valency changing devices such as the causative Regarding the former special attention is given to event structural conditions on passivization non canonical passives and the relation between passives and active impersonals Papers dealing with causatives focus on valency patterns and argument marking in canonical as well as extended uses of causative morphology Other articles consider converse constructions and the argument structure of middles which seem to hold a position between voice in the narrow sense and valency changing operations An introductory article provides background information on the repertoire of voice alternations in Baltic from a cross linguistic perspective Representing different approaches and methods the contributions to this volume offer fine grained analyses of data from contemporary Latvian and Lithuanian

The Linguistics of Eating and Drinking John Newman, 2009-03-11 This volume reviews a range of fascinating linguistic facts about ingestive predicates in the world s languages The highly multifaceted nature of eat and drink events gives rise to interesting clausal properties of these predicates such as the atypicality of transitive constructions involving eat and drink in some languages The two verbs are also sources for a large number of figurative uses across languages with meanings such as destroy and savour as well as participating in a great variety of idioms which can be quite opaque semantically Grammaticalized extensions of these predicates also occur such as the quantificational use of Hausa shaa drink meaning roughly do X frequently regularly Specialists discuss details of the use of
