

"Changing Conceptions of the Opium War as History and Experience"  
(Paper to be presented at the AAS conference at Toronto in 2017)

Xin Zhang  
Indiana University-Purdue University at Indianapolis

Academic and popular accounts of the Opium War have gone through nearly two centuries of change in focus, view, and scope.<sup>1</sup> Before the era of social history, the focus was on its political and institutional aspects; topics ranged from British imperialism to China's failure to re-enter the world system as a nation. After the rise of the "China-centered approach," however, though popular accounts focused on diplomacy and battles, most researchers abandoned the topic altogether. As cultural studies gained momentum, many scholars widened their scope to include the cultural and social facets of opium consumption but paid less attention to the war itself. Only in the wake of post-colonial studies did we return. Since then, knowledge and understandings of the war have been enhanced by putting China's modern transition into global contexts and seeing it in a longer sweep of history. This study intends to probe this sequence of changes in the writing of history as they appeared in different periods. I will first examine the period before the 1960s.

In many ways, the study of Chinese history from the very beginning up to the mid 1960s was undertaken under the strong influence of the Euro-centered perspective of global history as well as the teleological view of global changes. This is obvious in the focus of the research—the type of historical questions being asked and the answers historians were looking for—most of which was based on the assumption that China was a country of backward tradition and had to depend on stimuli from modern countries from Europe and North America to better itself.

With regards to the Opium War the main focus, aside from European imperialism, is how the Qing dynasty interacted with the West as a traditional

<sup>1</sup> We usually consider that the Opium War consists of two wars: one, the Opium War, also known as the First Opium War, took place between the British Empire and the Chinese Qing Dynasty from 1839 to 1842; the other, the Arrow War named after the British vessel involved in the incident that led to the war, also known as the Second Opium War, pitted the British Empire and the Second French Empire against the Chinese Qing dynasty from 1856 to 1860. It is not unusual for these separate wars to be seen as one, with the latter one as the continuation of the former. For example, scholars in mainland China usually consider the Arrow War a continuation of the First Opium War, presumably a result of the influence of Karl Marx's view on the war. To some degree, British scholars like Jack Beeching also consider the two wars as one; hence he calls them "the Opium Wars." I agree with J. Y. Wong that both wars share one common cause: the opium trade. Therefore, I will use the term "Opium War" to include both wars. For Wong's discussion of the definition, see J. Y. Wong, *Deadly Dreams: Opium, Imperialism, and the Arrow War (1856-1860) in China* (Cambridge: Cambridge University Press, 1998), 37.

**Naval Eyewitnesses** James Goult, 2022-11-04 Goult tells the story from the perspective of the ordinary sailor or officer who was there *The Northern Mariner*. Although many books have been written about naval actions during the Second World War histories and memoirs in particular few books have attempted to encompass the extraordinary variety of the experience of the war at sea. That is why James Goult's vivid survey is of such value. Sailors in the Royal Navy and the Merchant Navy experienced a war fought on a massive scale on every ocean of the world in a diverse range of vessels from battleships aircraft carriers and submarines to merchant ships and fishing boats. Their recollections are as varied as the ships they served in and they take the reader through the entire maritime war as it was perceived at the time by those who had direct personal knowledge of it. Throughout the book the emphasis is on the experience of individuals their recruitment and training their expectations and the reality they encountered on active service in many different offensive and defensive roles including convoy duty and coastal defence amphibious operations hunting U-boats and surface raiders mine sweeping and manning landing and rescue craft. A particularly graphic section describes in the words of the sailors themselves what action against the enemy felt like and the impact of casualties seamen who were wounded or killed on board or were lost when their ships sank. A fascinating inside view of the maritime warfare emerges which may be less heroic than the image created by some post-war accounts but it gives readers today a much more realistic impression of the whole gamut of wartime life at sea.

**Women in Allied Naval Intelligence in the Second World War** Sarah-Louise Miller, 2024-10-17 Closely examining the work of women in the US and British naval services towards Allied naval intelligence during the Second World War this book focuses on their contributions during the Battle of the Atlantic and Pacific Naval War in order to shed new light on arenas of war from which women's narratives are almost always absent. Including personal testimonies from those involved and surveying a wide cross-section of different roles Sarah-Louise Miller analyses the work of women at every level and rank in the US and British naval services and offers a much wider picture of how they assisted the Allied forces behind closed doors. With exploration of the work of the WRNS and WAVES on developing naval intelligence this book argues that they played a crucial role in the British and American SIGINT systems and within programs such as those at Bletchley Park and OP 20 G therefore directly impacting the organisation and outcome of Anglo-American naval efforts. Including analysis of the development of the modern kill chain Miller also re-evaluates the effect of the combat taboo to demonstrate that the WRNS and WAVES were in fact at the cutting edge of the emergence of modern warfare.

**The WRNS in Wartime** Hannah Roberts, 2017-11-24 The Women's Royal Naval Service (WRNS) was created in 1917 re-formed in 1938 and maintained after 1945. This book determines for the first time the reasons for the expansion and contraction of the service and the impact key individuals had on it and in turn the influence it had on its members. Hannah Roberts offers new insights into a previously little-studied British military institution which celebrates its centenary in 2017. She shows how political and military decision

making within the fluctuating national security situation coupled with a growing cultural acceptability of women taking on military roles allowed for the growth of the service in World War II into realms never expected of women Although it shared a similar pattern in its formation to the Auxiliary Territorial Service ATS and had a similar ethos to its Air Force counterpart the WAAF the WRNS took on a wider ranging role in the war in part due to the latitude afforded to the service because of its uniquely independent origins From 1941 onward the WRNS spread internationally and subverted the combat taboo by adopting semi combatant roles Using twenty one new oral histories and a multitude of archived personal documents this book demonstrates the pivotal importance of the Women s Royal Naval Service in both the world wars
