Changing Face Of National Security A Conceptual Analysis:

The Changing Face of National Security Robert Mandel,1994-09-29 This book contains a probing and comprehensive theoretical analysis of the emerging notion of national security in light of the dramatic post Cold War transformation of the international system It begins with a discussion of the nature of this change emphasizing declining national sovereignty escalating international interdependence and proliferating anarchic conflict After developing a framework of the conceptual components of national security this study focuses on analyzing change both in priorities and tradeoffs in military security economic security resource environmental security and political cultural security Brief case studies of the 1991 Gulf War the 1991 Maastricht Treaty the 1992 Earth Summit and the ongoing Yugoslavia conflict illustrate the theoretical contentions Finally a set of crucial fundamental security policy challenges and responses conclude the book **Armies Without States** Robert Mandel,2002 The book concludes with an assessment of the complexities surrounding responses to security privatization and an exploration of when and whether it should be promoted rather than prevented BOOK JACKET

Security in the Information Age ,2002 *Security in the Information Age* United States. Congress. Joint Economic Committee,2002 *Security and Privacy* John Kleinig,Seumas Miller,Peter Mameli,Douglas Salane,Adina Schwartz,2011-12-01 This study is principally concerned with the ethical dimensions of identity management technology electronic surveillance the mining of personal data and profiling in the context of transnational crime and global terrorism The ethical challenge at the heart of this study is to establish an acceptable and sustainable equilibrium between two central moral values in contemporary liberal democracies namely security and privacy Both values are essential to individual liberty but they come into conflict in times when civil order is threatened as has been the case from late in the twentieth century with the advent of global terrorism and trans national crime We seek to articulate legally sustainable politically possible and technologically feasible global ethical standards for identity management technology and policies in liberal democracies in the contemporary global security context Although the standards in question are to be understood as global ethical standards potentially to be adopted not only by the United States but also by the European Union India Australasia and other contemporary liberal democratic states we take as our primary focus the tensions that have arisen between the United States and the European Union *Human Security Studies: Theories, Methods And Themes* Sorpong Peou,2014-03-31 Human Security Studies Theories Methods and Themes examines the concept of human security from different theoretical and methodological perspectives and shows how they help shed light on the different themes of global intervention Liberal perspectives represented by global legalism and developmentalism share the optimism that human security can be ensured and enhanced through strengthening global governance Realists remain skeptical about this liberal vision While also critical of the liberal promise critical theorists and feminists offer radical perspectives on human security All these perspectives help explain the challenges of military intervention for human protection micro disarmament international criminal justice smart

sanctions human rights and democracy promotion and human development **Law in Times of Crisis** Oren Gross, Fionnuala Ní Aoláin, 2006-10-30 The terrorist attacks of September 11 2001 and the ensuing war on terror have focused attention on issues that have previously lurked in a dark corner at the edge of the legal universe This book presents a systematic and comprehensive attempt by legal scholars to conceptualize the theory of emergency powers combining post September 11 developments with more general theoretical historical and comparative perspectives The authors examine the interface between law and violent crises through history and across jurisdictions bringing together insights gleaned from the Roman republic and Jewish law through to the initial responses to the July 2005 attacks in London Three models of emergency powers are used to offer a conceptualization of emergency regimes giving a coherent insight into law's interface with and regulation of crisis and a distinctive means to evaluate the legal options open to states for dealing with crises

National, European and Human Security Mary Martin, Mary Kaldor, Narcís Serra, 2013 This book examines how national security strategies relate to an emerging common European or global vision of security and to human security ideas Human security and national security are often regarded as competing and mutually antagonistic the former was proposed and has been operationalised in ways which represent a paradigm shift away from state centric approaches and the dominance of national security perspectives This has led to human security being associated with a broadening of the security agenda to encompass not only physical security the use of force and military capabilities but also the provision of material well being and dignity to vulnerable communities This edited volume seeks to identify key concepts and themes in the national discourse of several European countries addressing security at a meta narrative and conceptual level illustrating the changes taking place in approaches to security and in particular mapping moves away from a paradigm of national security to one which might be called human security It also enables an assessment of whether national security is currently converging at either European or global levels This book will be of much interest to students of human security European politics discourse analysis war and conflict studies and IR security studies in general *Raimo Väyrynen: A Pioneer in International Relations, Scholarship and Policy-Making* Raimo Väyrynen, 2023-01-03 This book provides a broad overview of Professor Raimo Väyrynen's academic work his role in international research organizations and his contributions to policy debates It offers an interesting review of important political issues during the time span of half a century from disarmament in Europe to the changing relationship between state sovereignty and transnational forces Väyrynen has dealt with the changing agenda of peace and international relations security and the arms race and the world economy This book provides comprehensive analyses of the regional and systemic structure of international relations with the emphasis on conflicts and warfare between nations It argues that while states even smaller ones still matter transnational issues are increasingly important Taking a historical perspective the articles suggest that large scale violence and arms races have been recurrent and cyclical phenomena in international relations These events reflect the deep seated inequalities in the political and

economic systems which moreover vary considerably between regions The publication is important reading for any researcher as well as students policy makers and the science oriented public at large Traces the changing agenda of international relations from disarmament and the world economy to the changing relationship between state sovereignty and transnational forces Provides analyses of the regional and systemic structure in international relations with the emphasis on conflicts and warfare Argues that large scale violence and the arms race have been recurrent and cyclical phenomena in international relations Reviews important political issues from peace and conflict in Europe to the changing power relationship in the world *U.S. National Security Policy and Strategy, 1987-1994* Robert A. Vitas, John A. Williams, 1996-05-14 Covering the transition from the Cold War to an uncertain post Cold War era this volume shows policy makers and political leaders grappling with the loss of a paradigm that provided intellectual stability for 50 years It examines changes in the security landscape institutions weapons and U S military actions The volume includes U S government documents from 1987 to 1994 covering national security institutions changing visions of the international security landscape post Cold War East West relations nuclear strategy and arms control and U S involvement in Central America the Persian Gulf Somalia and Haiti Each chapter begins with an introduction to frame the issues events and policy proposals An introductory chapter establishes a framework for the study of U S national security The concluding chapter is a note on primary research sources on the subject This volume establishes a sense of history and perspective in the study and teaching of contemporary national security A careful reading of these documents should bring insights into the policy process along with the meaning of American values interests and national strategy at least from the perspective of U S government officials In this respect the primary documents speak for themselves **America's Coast Guard** Bruce B. Stubbs, 2000 **Security Studies for the 21st Century** Richard H. Shultz, Roy Godson, George H. Quester, 1997 Are world politics more or less stable violence prone and anxiety producing today than in previous eras How are states and nonstate actors coping with these issues What new material do the public and especially students of security studies need to understand the security environment of the next century The editors of this ambitious successor volume to *Security Studies for the 1990s* approach the subject from national international regional transstate and comparative perspectives Each chapter provides an in depth review of a major security aspect of the subject providing key concepts methods suggested course structure a bibliography and a model syllabus This book is designed primarily for courses at the graduate level but it can also be adapted for undergraduates *African Journal of International Affairs & Development*, 2005 *The Bewildered Herd* B. A. Taleb, 2004 For the first time a work that contains all that should be known about the media s orientation of the public mind in democratic societies why this manipulation takes place and in what manner *The Bewildered Herd* does not only analyse the media s current functions and forms in human society but it also traces and discusses the various transformations that this increasingly powerful social actor has gone through The case study used for the purposes of this work is both unequal and

unique in its nature depth and revelations It compares the media s coverage in two of the world s leading democracies The United States and France of two of the world s most important armed conflicts and crises It analyses both countries national economic cultural and social interests as well as their respective media s coverage of these two conflicts and reveals how public perceptions are affected by this coverage and how the agendas of both the media and the political establishment is best served by this manipulation of public opinion in democratic societies Mechanisms and tactics used in conditioning the public are extensively revealed and analysed in a manner that is so comprehensive in its approach and in its explanations

The Iranian Journal of International Affairs ,2002 **Security Studies for the 1990s** Richard H. Shultz,Roy Godson,Ted Greenwood,1993 The United States is grappling with a new security framework to replace the structure of the Cold War era American policymakers face a host of challenges including regional conflicts ethnic tensions and weapons proliferation that commanded little attention in the past And tomorrow is likely to bring new concerns barely on today s horizon Despite these changes the study of national security remains largely a creature of the Cold War The security studies discipline needs to be overhauled But how should it be revised so that tomorrow s citizens and experts are equipped to understand and help manage new challenges One option is to downgrade security studies and divert educational resources elsewhere Another is to redefine the subject to include the study of an all encompassing list of international problems The third choice is to retain basic definitions concepts and subjects while also making significant adjustments Security Studies for the 1990s addresses all three options This book is the first to reexamine security studies in the post Cold War era Scholars and directors from leading security studies programs representing a cross section of viewpoints on foreign affairs discuss what new material needs to be taught and which courses and concepts should be recast Each chapter provides an indepth review of a major security studies course proposing needed changes and a model syllabus Subjects include intelligence policy global environmental problems the causes and termination of wars and collective security A chapter on the teaching of ethics a subject often neglected in the past is also featured BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *The Founding of Russia's Navy* Edward Phillips,1995-05-23 The reign of Peter the Great 1682 1725 long regarded as the turning point in the Europeanization of Russia witnessed the establishment of Russia s first modern navy the Azov Sea fleet Its creation evokes a fundamental question about the era was Peter a reformer or a revolutionary This three part study examines Russia s maritime experience in the 17th and early 18th centuries in order to address this central question The author argues that Peter s development of the navy was revolutionary in the scale and level of technology brought to fruition through the reform of existing political and social structures **EEZ Technology** ,1999
