Changing Industrial Relations And Modernisation Of Labour Law:

Changing Industrial Relations & Modernisation of Labour Law Marco Biagi, 2003-01-01 Thirty three distinguished authorities in the field of labour and industrial relations law gather here to enhance and complement the work of the late Marco Biagi a man who at the time of his violent and untimely death had shown himself to be the most insightful and committed international scholar in this complex and controversial and as it proved even dangerous field The topics covered range over many of Professor Biagi s special interests including the following the formulation of a new basis for labour law that could resolve new issues employee protection in corporate restructuring the trend toward individual enterprise bargaining a new European employment policy and what it might entail the growing phenomenon of flexibilisation the effects of an aging workforce the crucial nexus of free trade labour and human rights the promise of EU enlargement and protection of part time workers There is a lot of insight innovation and just clear thinking in this wide ranging and far reaching book It will be of exceptional value to scholars lawyers and others concerned with the extensive and unpredictable changes under way in today s world of work

The Transformation of Labour Law in Europe Bob Hepple, Bruno Veneziani, 2009-09-02 This book compares how EU Member States shaped the developments made between 1945 and 2004 in the context of economic social and political change

The Modernization of Labour Law and Industrial Relations in a Comparative Perspective Silvia Spattini, 2009-01-01 Not all labour law and industrial relations scholars agree on the efficacy of the comparative approach that the analysis of measures adopted in other countries can play a constructive role in national and local policy making However the case deserves to be heard and no better such presentation has appeared than this remarkable book the carefully considered work of over 40 well known authorities in the field from a wide variety of countries including Australia France India Israel Peru Poland and South Africa The volume contains papers delivered at a conference sponsored by the Marco Biagi Foundation at the University of Modena and Reggio Emilia in March 2008

Comparative Labour Law and Industrial Relations in Industrialized Market Economies Roger Blanpain, 2007 Comparativism is no longer a purely academic exercise but has increasingly become an urgent necessity for industrial relations and legal practitioners due To The growth of multinational enterprises And The impact of international and regional organizations aspiring to harmonize rules The growing need for comprehensive up to date and readily available information on labour law and industrial relations in different countries led to the publication of the International Encyclopaedia for Labour Law and Industrial Relations In which more than 70 international and national monographs have thus far been published This book Comparative Labour Law and Industrial Relations in Industrialized Market Economies goes a step further than the Encyclopaedia in as much as most of the chapters provide comparative and integrated thematic treatment The aim is to describe the salient characteristics and trends in labour law and industrial relations in the contemporary world This book is obviously not exhaustive with respect to the coverage of countries and topics The authors limit themselves mainly to the industrialized market economies The book is

divided in three main parts an introduction relating to methodology and documentation including the use of Internet The second part concerns international actors like the International Employers' Organisations And The International Trade Union Movement As well as Human Resources Management The third concerns the sources of regulation concentrating on International and European Labour Law as well as on Codes of Conduct for Multinational Enterprises and describes also the rules in case of conflict of laws The last part deals with international developments and comparative studies in not less than 15 chapters The IXth edition will like the previous editions serve as a textbook and reference work to facilitate the task of teachers and students of comparative labour law and industrial relations it will also provide labour lawyers with the necessary insights to cope with a world which is increasingly international
