Changing Law:

Law and Social Solidarity in Contemporary China Han Peng,2020-12-29 This book adopts Durkheim's legal perspective to treat law as a symbol of social solidarities to examine Chinese society. The work analyzes changes in the nature of social solidarity from observing changes in laws, thus drawing together western socio-legal theory and distinctive Chinese conditions. It draws on Durkheim's theoretical framework and methodology to develop a more comprehensive understanding of the role of law using theories of others such as Habermas and by taking into account the discussion of power and the conflicts of interests in analyzing key social features during transition. The analysis of social anomie in terms of the changes of juridical rules as well as the changes in the nature of social solidarity provides an inspiring perspective to look into contemporary social problems. The book will be essential reading for researchers and academics working in the areas of socio-legal studies, legal theory and law and society in China. *Property Law and Climate Change* Vanessa Johnston, Ben

France-Hudson,2026-04-23 *Property Law and Climate Change Inextricably Linked* reveals a critical oversight in global climate action: the failure to integrate property law into climate policy and regulatory frameworks. Through systematic analysis of mitigation and adaptation strategies, *Property Law and Climate Change Inextricably Linked* demonstrates how the neglect of property law fundamentals undermines the effectiveness of climate responses, with particular focus on Australia and New Zealand. The book offers both diagnosis and direction, examining why current approaches fall short and identifying how property law integration could strengthen climate responses. From land use planning to coastal adaptation and carbon sequestration, the authors demonstrate that property law must be integrated within climate change policy. By mapping these crucial connections, this book provides a roadmap for developing regulatory frameworks that work with rather than against existing property systems. This book will appeal to researchers in the fields of property law, environmental law and governance and comparative law. It will also be of interest to policymakers, lawmakers, urban planners and legal practitioners.

The Oxford Handbook of International Climate Change Law Cinnamon Piñon Carlarne, Kevin R. Gray, Richard Tarasofsky,2016 As the threats posed by changing weather patterns are becoming more apparent, climate change law has emerged as an important area of law in its own right. This Handbook provides a comprehensive understanding of this growing subject, setting out the key institutions and processes and featuring interdisciplinary insights from leading experts. **A**
