hurled against a gigantic and terrible calamity To day in resuming our interrupted studies we look back upon the men and the controversies of yesterday with a sort of melancholy perplexity as though left stranded upon another shore they were withdrawn from us for all time and already belonged to another century It is not the few years that have elapsed that divide us from them but rather the nature of the events that have transpired About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Antonio Fogazzaro, Etc. the nineteenth centuries witness significant advancement in the production and crucially the consumption of culture in Italy. During the long process towards and beyond Italy becoming a nation state in 1861, new modes of writing and performing the novel, the self-help manual, theatrical improvisation, develop in response to new practices and technologies of production and distribution. Key to the emergence of an inclusive national audience in Italy is however the audience itself. A wide and varied body of consumers of culture, animated by the notion of an Italian national cultural identity, create in this period an increasingly complex demand for different cultural products. This body is energized by the wider access to education and to the Italian language brought about by educational reforms, by growing urbanization, by enhanced social mobility, and by transcultural connections across European borders. This book investigates this process, analyzing the ways in which authors, composers, publishers, performers, journalists, and editors engage with the anxieties and aspirations of their diverse audiences. Fourteen essays by specialists in the field, exploring individual contexts and cases, demonstrate how interests related to gender, social class, cultural background, and practices of reading and spectatorship exert determining influence upon the production of culture in this period. They describe how women, men, and children from across the social and regional strata of the emerging nation contribute incrementally but actively to the idea and the growing reality of an Italian national cultural life. They show that from newspapers to salon performances, from letters to treatises in social science, from popular novels to literary criticism, from philosophical discussions to opera theaters, there is evidence in Italy in this period of unprecedented participation, crossing academic and popular cultures in the formation of a national audience in Italy. This cultural transformation later produces the mass culture in Italy, which underpins the major movements of the twentieth century and which undergoes new challenges and reformulations in the Italy we know today.
