**Britain, 1890s-1920s** Binckes Faith Binckes,2019-04-10 New perspectives on women s contributions to periodical culture in  
the era of modernismThis collection highlights the contributions of women writers editors and critics to periodical culture in  
the late nineteenth and early twentieth centuries It explores women s role in shaping conversations about modernism and  
modernity across varied aesthetic and ideological registers and foregrounds how such participation was shaped by a wide  
range of periodical genres The essays focus on well known publications and introduce those as yet obscure and understudied  
including middlebrow and popular magazines movement based radical papers avant garde titles and classic Little Magazines  
Examining neglected figures and shining new light on familiar ones the collection enriches our understanding of the role  
women played in the print culture of this transformative period Key FeaturesHelps recover neglected women writers and  
cast new light on canonical onesHighlights the geographical diversity of modern British print cultureEmphasises the  
interdisciplinary nature of modernism including essays on modernist dance music cinema drama and architecture Includes a

**and War** Charles Stanford Read,1920      **More Than Just War** Charles Jones,2013-03-12 This book raises questions about  
the just war tradition through a critical examination of its revival and by juxtaposing it with a literary phenomenology of war  
Recent public debate about war has leaned heavily on a just war tradition dating back many centuries This book examines  
the recent revival of that tradition in the United States and Britain arguing that it is less coherent and comprehensive as an  
approach to the ethical issues arising from war than is generally supposed and that it is inconsistent in important ways with  
the theology on which it was originally based A second line of criticism is mounted through close readings of modern texts in  
English from Britain Australia and the USA that together constitute a more subjective bottom up understanding of the moral  
dilemmas of military life In this second tradition the task of representing war is seen as more problematic and its rationality  
more questionable than in just war discourse Works by William Shakespeare Sir Walter Scott James Fennimore Cooper  
Stephen Crane John Buchan Robert Louis Stevenson Joseph Conrad Tim O Brien and Kurt Vonnegut are featured The book  
will be of great interest to students and scholars of security studies military studies theology and international relations  
*War Or Health* Ilkka Taipale,2002 This comprehensive reader of 70 specially commissioned essays provides an unusually  
wide ranging examination of the connection between warfare and human health and society Contributors look at the  
changing character of wars and their effects on civilization the medical and health aspects of different types of weapons the  
changing roles of health professionals in war the arms trade social tensions the media theories of violence and war as a social
