Apoptosis Genes:

Apoptosis Genes James W. Wilson, Catherine Booth, Christopher S. Potten, 2012-12-06 Apoptosis or programmed cell death is a natural process by which damaged or unwanted cells are dismantled in an orderly and atraumatic fashion It is of critical importance in development homeostasis and cell population control Research over the last decade is now enabling scientists to comprehend how genes and the protein products interact to control apoptosis This has led to the current position where researchers may be able to directly modify the action of key proteins through gene therapy and antisense oligonucleotides Apoptosis Genes presents a current overview of key genes involved in the control of apoptosis research together with thoughts on future prospects and clinical applications While there are several books written on apoptosis Apoptosis Genes deals specifically with the regulation of apoptosis Given the increased interest in the role of apoptosis genes in disease processes this work will be useful to researchers investigating cancer autoimmune disease viral infection cardiovascular disease neurodegenerative disorders AIDS osteoporosis and aging

A Curative Cancer Treatment Isaac Lasley,2011-02-24
This is a genetic therapy that has the potential to cure any genetic line of cancer The multibillion dollar cancer treatment industry can be put out of business forever Cancers can effectively be cured at all stages by utilizing this genetic therapy Cancer can now be cured in laboratories All you need is a geneticist to brew up your curative cancer treatment cocktail for your genetic line of cancer and you will be cured with a minimal number of treatments This is a real proposal as the author has been threatened with lawsuits but never been victim to them since the multibillion dollar a year cancer treatment industry s big corporate entities would have to try to disprove this genetic therapy in open court and as a result put them out of business forever since it is a valid cure Make your doctors listen as they will tell you that I am a liar at first but after you walk them through the steps of making a virus that attacks cancer cells by asking Is this possible at every step they will not be able to deny that a cure for cancer is possible By purchasing a copy and telling a friend you can help to cure cancers and stop the continued treatments for profit
