Appalachian Patterns:

Appalachian Patterns Bo Ball, 2002-01-01 Pearl Harbor December 7 1941 High on the bridge of the USS West Virginia Sfc Lee Ebner was looking forward to the end of his watch and a relaxed Sunday morning breakfast But the two low flying planes painted with rising sun insignia and bearing down on the ship had other plans for him and his fellow seamen Ten hours later at Clark Field in the Philippines Pfc Jack Reed felt the brunt of another Japanese air attack and within weeks found himself a part of the gruesome Bataan Death March that was to claim the lives of hundred of his comrades On another continent four years into the war Capt Benjamin Butler led his exhausted company up a steep fog shrouded Italian mountain toward a well entrenched German defensive position The odds against their survival were appalling though worse was to come in the months ahead Such were the experiences of many young men plucked from their local communities all across America trained for war and hurled into the strange reality of combat thousands of miles from home In this stunning collection of World War II oral histories Arthur Kelly recreates the experiences of twelve young men from Kentucky who survived the seemingly unsurvivable whether in combat or as prisoners of war *Appalachian Patterns* Bo Ball, 1988

Archaeological Perspectives on the Southern Appalachians Ramie A. Gougeon, Maureen Meyers, 2026-10-25 In the last four decades southeastern archaeology has increasingly developed a processual method of looking at archaeological data through varying levels of scale By adjusting the scale archaeologists can further define societal interactions and exchanges which is particularly useful to those researching the Mississippian period as the rise and fall of chiefdoms was both internally complex and externally influenced by broader regional factors This use of the most current research methods has enabled a more comprehensive understanding of prehistoric and historic sociopolitical entities In *Archaeological Perspectives of the Southern Appalachians* Ramie A Gougeon and Maureen S Meyers have brought together a dozen archaeologists to delineate multiscale approaches to Native American sites throughout southern Appalachia The essays range in topic from ceramic assemblages in northern Georgia to public architecture in North Carolina to the frontiers of southern Appalachia in Virginia Throughout the volume the contributors discuss varying scales of analysis in their own research to flesh out the importance of maintaining different perspectives when evaluating archaeological evidence Additionally the volume makes particular reference to the work of David Hally whose influence on not only the editors and contributors but on southeastern archaeology as a whole cannot be overstated While Hally was neither a pioneer nor vocal champion of scale variation his impeccable research culminating with the publication of his magnum opus *King The Social Archaeology of a Late Mississippian Town in Northwestern Georgia* paved the way for younger scholars to truly develop research methods for holistic social archaeology

Appalachia's Children: The Challenge of Mental Health David H. Loeff,1971 The analysis of the developmental experiences and resulting personality patterns of Southern Appalachian children is based upon fieldwork in psychiatric clinics in eastern Kentucky where diagnostic evaluation and treatment were provided for emotionally disturbed children Observations on the mental health or mental disorder of the children are made concurrently with and in the light of observations on the ways in which eastern Kentucky families raise their children and on the kinds of adjustments to life that these children make The historical geographic and socioeconomic characteristics of the region in addition to characteristic family life styles and child rearing practices are presented as the necessary context for understanding the children s mental health problems Mental disorders are viewed largely as social phenomena and mental health or disorder is seen as firmly embedded in the social matrix The study of family structure and interrelationships reveals three prominent themes influential in child development emphasis on infancy of the children and family closeness poor development of verbal skills and the consideration of sexual maturation and functioning as a tabooed topic Instances of emotional disturbance discussed are grouped accordingly dependency themes communication patterns and psychosexual themes Kw
