Multi-Objective Optimization in Computer Networks Using Metaheuristics Yezid Donoso,Ramon Fabregat,2016-04-19 Metaheuristics are widely used to solve important practical combinatorial optimization problems Many new multicast applications emerging from the Internet such as TV over the Internet radio over the Internet and multipoint video streaming require reduced bandwidth consumption end to end delay and packet loss ratio It is necessary to design an

Knowledge-Driven Computing Carlos Cotta,Simeon Reich,Antoni Ligeza,2008-07-19 The main aim of this volume has been to gather together a selection of recent papers providing new ideas and solutions for a wide spectrum of Knowledge Driven Computing approaches More precisely the ultimate goal has been to collect new knowledge representation processing and computing paradigms which could be useful to practitioners involved in the area of discussion To this end contributions covering both theoretical aspects and practical solutions were preferred **Small-Signal Stability Modelling and Optimization of Microgrids** Simon Eberlein,2021-08-31 The stability of power systems and microgrids is compromised by the increasing penetration with power electronic devices such as wind turbines photovoltaics and batteries A simulation and optimization environment for such low inertia systems is created It is investigated how accurate the models need to be to capture the prevailing modes An evolutionary algorithm tailored to optimization problems with computationally intensive fitness evaluation is proposed in order to optimized the controller parameters of grid forming and grid supporting distributed generators It becomes apparent that microgrids dominated by grid forming inverters are very stable systems when well designed and optimized controllers are used Model simplifications such as the neglect of inner control loops of inverters must be examined carefully as they can lead to an inaccurate stability assessment **Soft Computing in Data Science** Michael W.
