O'Connor, 1994

Over the past two decades applied ethics has turned increasingly toward theories that explore ethical questions faced by a variety of professions and away from classic moral concerns Abraham Edel Elizabeth Flower and Finbarr O Connor utilize examples of professional public policy and personal decision making to illustrate the strengths and limitations of the application of ethics in a rapidly changing world They first discuss the emergence of applied ethics and how it functions within a philosophical tradition They are not concerned however with solving the problems they expose but with employing them as a means to critique applied ethics Using human rights and health and welfare issues the authors examine the subsequent ethical stumbling blocks that surround the moral order of these social concerns Through a historical discussion of the abundant ethical theories posited since the Enlightenment they suggest ways to decide which can serve as intellectual tools for applied ethics and consider how knowledge and experience enter into any moral decision Turning to the factors pertinent in the analysis and solution of moral problems they dissect the underlying influences on the practice of ethics the way in which a moral problem is diagnosed and its relevant contexts established the ensuing conflicts between the concerns of the individual and of society and the degree of inventiveness in issues of morality The authors suggest that instead of viewing theory as a set consequence derived from prior applications relating theory to practice will engage a process of mutual aid from which each element will learn refining and improving the other Author note Abraham Edel is Research Professor University of Pennsylvania and Distinguished Professor of Philosophy Emeritus City University of New York Elizabeth Flower is Professor of Philosophy University of Pennsylvania Finbarr O Connor is Professor of Philosophy Beaver College The three collaboratively edited *Morality Philosophy and Practice Historical and Contemporary Readings and Studies*

Applied ethics and social problems Tony Fitzpatrick,2008-06-04 Designed to address practical questions applied ethics is one of the most exciting areas in contemporary philosophy Yet the relevance of ethical theories to social policy has been under explored Until now In Applied ethics and social problems Tony Fitzpatrick presents introductions to the three most influential moral philosophies Consequentialism Kantianism and Virtue Ethics He then relates these to some of the most urgent questions in contemporary public debates about the future of welfare services These include taxing unhealthy habits drug legalisation parental choice in education abortion euthanasia and migration cultural diversity In each case he asks a perennial question what are the legitimate boundaries of state action and individual liberty

Never before has there been such a rigorous overview of the topic offered to social policy students academics and professionals as well as those interested in public policy politics and social science A user friendly intervention into these key debates Applied ethics and social problems will set the agenda for years to come *The Confluence of Philosophy and Law in Applied Ethics* Norbert Paulo, 2016-05-26 The law serves a function that is not often taken seriously enough by ethicists namely practicability A consequence of practicability is that law requires elaborated and explicit methodologies that determine how to do things with norms This consequence forms the core idea behind this book which employs methods from legal theory to inform and examine debates on methodology in applied ethics particularly bioethics It is argued that almost all legal methods have counterparts in applied ethics which indicates that much can be gained from comparative study of the two The author first outlines methods as used in legal theory focusing on deductive reasoning with statutes as well as analogical reasoning with precedent cases He then examines three representative kinds of contemporary ethical theories Beauchamp and Childress's principlism Jonsen and Toulmin's casuistry and two versions of consequentialism Singer's preference utilitarianism and Hooker's rule consequentialism with regards to their methods These examinations lead to the Morisprudence Model for methods in applied ethics
