Advances In Data Mining And Modeling:

Advances In Data Mining And Modeling Wai Ki Ching, Michael Kwok-po Ng, 2003-04-03 Data mining and data modeling are hot topics and are under fast development. Because of their wide applications and rich research contents, many practitioners and academics are attracted to work in these areas. With a view to promoting communication and collaboration among the practitioners and researchers in Hong Kong, a workshop on data mining and modeling was held in June 2002. Prof. Ngaiming Mok, Director of the Institute of Mathematical Research, The University of Hong Kong, and Prof. Tze Leung Lai, Stanford University, C. V. Starr Professor of the University of Hong Kong, initiated the workshop. This book contains selected papers presented at the workshop. The papers fall into two main categories: data mining and data modeling. Data mining papers deal with pattern discovery, clustering, algorithms, classification, and practical applications in the stock market. Data modeling papers treat neural network models, time series models, statistical models, and practical applications.

Advances in Data Mining Petra Pernert, 2002-08-21 This book presents six thoroughly reviewed and revised full papers describing selected projects on data mining. Three papers deal with data mining and e-commerce, focusing on sequence rule analysis, association rule mining, and knowledge discovery in databases and intelligent e-marketing with Web mining. One paper is devoted to experience management and process learning. The last two papers report on medical applications, namely on genomic data processing and on case-based reasoning for prognosis of influenza.
