Plant Tissue Culture Sant Saran Bhojwani,Vibha Dhawan,Edward Charles Cocking,1986 The tremendous accumulation of information on plant tissue culture is making it extremely difficult for anyone to keep fully abreast with the literature even in his own specialised area Therefore the authors have compiled a bibliography of plant tissue culture as a ready reference for those who are already working in this field and have also made the task easier for those who have become interested in plant tissue culture The idea of preparing the bibliography was conceived after completing the book *Plant Tissue Culture Theory and Practice* Elsevier 1982 Recognition of the various potential industrial applications of plant biotechnology has considerably enhanced the importance of plant tissue culture PTC as the latter holds a pivotal position in the realisation of the final goal of crop improvement via cell manipulation and multiplication It is also becoming increasingly popular in basic studies in plant sciences Consequently there has been an explosion in the literature on PTC since 1970 A distinctive feature of the present compilation is that it covers all aspects of PTC of higher plants including Gymnosperms
