Advances in Computer Graphics IV W.T. Hewitt, Michel Grave, Michel Roch, 2012-12-06 This fourth volume of Advances in Computer Graphics gathers together a selection of the tutorials presented at the EUROGRAPHICS annual conference in Nice France September 1988 The six contributions cover various disciplines in Computer Graphics giving either an in depth view of a specific topic or an updated overview of a large area Chapter 1 Object oriented Computer Graphics introduces the concepts of object oriented programming and shows how they can be applied in different fields of Computer Graphics such

as modelling animation and user interface design Finally it provides an extensive bibliography for those who want to know more about this fast growing subject Chapter 2 Projective Geometry and Computer Graphics is a detailed presentation of the mathematics of projective geometry which serves as the mathematical background for all graphic packages including GKS GKS 3D and PRIGS This useful paper gives in a single document information formerly scattered throughout the literature and can be used as a reference for those who have to implement graphics and CAD systems Chapter 3 GKS 3D and PHIGS Theory and Practice describes both standards for 3D graphics and shows how each of them is better adapted in different typical applications It provides answers to those who have to choose a basic 3D graphics library for their developments or to people who have to define their future policy for graphics
