**Advancing Faculty Learning Through Interdisciplinary Collaboration** Elizabeth G. Creamer, 2005-08-16 This volume addresses the limitations of an instrumental perspective on collaboration and explores why stakeholders in higher education should refocus attention on collaboration as a source of faculty learning The chapters establish a theoretical basis for thinking about faculty learning and then use case studies to explore this topic in the context of service or outreach research and teaching Included as well are a meta analysis of the cases to demonstrate what they teach about contexts that promote faculty learning and a discussion of the implications of the analysis for higher education policy and practice including the evaluation of collaboratively produced work The framework and cases are useful to an audience of academic leaders committed to faculty development and to creating hiring promotion and tenure policies that reward the full range of scholarly pursuits They should also prove instructive to faculty embarking on interdisciplinary teaching research or outreach activities This is the 102nd issue of the Jossey Bass quarterly report series New Directions for Teaching and Learning

Hoppe, Bruce W. Speck, 2005 This issue looks at spirituality in higher education through a number of lenses examining what many view as trend towards incorporating spirituality back into the lives of students faculty and administrators Questions about meaning and purpose are as old as humans and in the earliest days of higher education the search for truth was the ultimate journey of the student Over the decades though the academy has often shunned the

spiritual aspect of a student's education. Whether that is to avoid controversy or to protect from acknowledging that all is not known, there is a predisposition to avoid talking about spirituality in the academy. Regardless, the result is the creation of what T. S. Eliot called hollow men who live in this world but do not know why they are here and thus do not know how to live their lives. This book is responding to a reawakening of desire to avoid such creatures. The issue's purpose, at least in a cursory way, is to look at spirituality in academe through a number of lenses. Composed of chapters from both faculty and administrators, this volume offers insight into the critical need for spirituality in educating the whole student while recognizing that how spirituality is viewed and taught and experienced is intensely personal. The goal is not to prescribe how spirituality should be integrated but to offer multiple options and perspectives. Not only will readers learn about the complex and vital role of spirituality; they will also be reminded that the quest for truth and meaning, not the destination, is what is vitally important in shaping discussions about spirituality. This is the 104th issue of the Jossey-Bass quarterly support series *New Directions for Teaching and Learning*. **A Laboratory for Public Scholarship and Democracy** Rosa A. Eberly, 2006-04-10. This volume addresses the academy's increased interest in contributing to the public good in more than just a superficial way. The authors of this volume examine an alternative way of thinking that brings more than disciplinary expertise to bear on public issues. FROM THE SERIES EDITOR Neither White Nor Male Katherine Grace Hendrix, 2007. Given the state of information on the academic experience in general and on the pedagogical strategies and strengths of faculty of color, in particular, the scholars in this issue have come together to begin the process of articulating the academic experiences of female professors of color. While chronicling our challenges within academia as well as our contributions to the education of U.S. students, this collaborative effort will add depth to the existing literature on faculty of color, serve as a reference for positioning women of color within the larger context of higher education, moving us from the margin to the center, and lay a foundation for more inclusive future research. This is the 110th volume of the Jossey-Bass quarterly report *New Directions for Teaching and Learning*. **Journal of Engineering Education**, 2007.
