Can Governments Learn? Frans L. Leeuw, 2020-03-05 There is continual concern about the ability of governments to perform the duties and responsibilities that their citizens have come to expect from them Many citizens view government as inept arthritic and dedicated to the preservation of the bureaucratic status quo As we close the twentieth century the challenge for democratic governments is to become adaptive flexible innovative and creative In short they need to become learning organizations This book explores what it will take for governments to break out of their traditional ways of approaching problems and learn new approaches to finding solutions *Can Governments Learn* examines organizational learning in the public sector It seeks to understand the role policy and program evaluation information can play in helping governments learn Among the democratic societies studied are Belgium Canada the Netherlands Sweden and the United States Significantly the studies documented here show that the concept of organizational learning has vitality and applicability cross nationally *Can Governments Learn* evaluates preconditions for governmental learning as well as the institutional and human resource factors that contribute to the process This volume in the Comparative Policy Analysis Series is essential for policymakers government officials and scholars interested in improving the performance of governments

Building Effective Evaluation Capacity Richard Boyle, Donald Lemaire, In the 1960s policy and program evaluation was used to improve government programs and enhance monitoring In the 1970s and 1980s evaluation was redefined as a tool of accountability via the budgetary process to assess government performance against standards and objectives *Building Effective Evaluation Capacity* draws upon three decades of experience and observation to derive prescriptive lessons A wealth of illustrative case studies of good practice highlight the book Rather than proposing a single model for evaluation capacity development this comparative approach allows readers to apply the findings to their own circumstances *Building Effective Evaluation Capacity* will be of interest to public policy specialists economists and students of government and
